

2023-2024 Medicaid Managed Care Rate Guide - Version published for Public Notice	2023-2024 Medicaid Managed Care Rate Guide - Revised Version	Type of Change	Reason for Change	Burden Change
Section I.7.B.i.b included two examples of when a retrospective acuity adjustment may be utilized including when (1) a new population coming into the Medicaid program; and (2) a Medicaid population that is moving from FFS to managed care when enrollment is voluntary and there may be concerns about adverse selection.	Section I.7.B.i.b now includes a third example of when a retrospective acuity adjustment may be used, specifically due to the unwinding of the COVID-19 public health emergency (such as the resumption of Medicaid eligibility determinations when the continuous enrollment condition ends as part of the Consolidated Appropriations Act, 2023).	Rev	We received a public comment on this topic and decided to include this additional example for clarity.	No

Type of Change: Rev = Revision, Del = Deletion, Add = Addition, and Red = Redesignation
