

Supplemental Application Template

Burden Statement for EPA Form 5900-680

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2060-NEW). Responses to this collection of information are voluntary (2 CFR 200 at 2 CFR 1500). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 7.4 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

Instructions

Per the CSB Notice of Funding Opportunity (NOFO), applicants should use the "Other Attachments" Form in Grants.gov to upload an .xls or .xlsx file and submit the Applicant Fleet Sheet.

The purpose of the Applicant Fleet Description (also known as the Applicant Fleet Sheet) is to describe in detail the specific vehicles targeted for emissions reductions as well as installation of charging equipment to be implemented under the proposed project. Information provided in the Applicant Fleet Sheet will be used to help determine project eligibility and for evaluation purposes. Applicants are encouraged to use the sample format for the Applicant Fleet Sheet found at: www.epa.gov/cleanschoolbus. Please only update information for the specific quarter in which this fleet sheet is being submitted. Applicants only need to fill out shaded cells highlighted blue with a diagonal pattern (///). Please complete tabs in this workbook according to the instructions below.

Excel Workbook Tab	Definition
1. Instructions	Basic instructions for all worksheets in this reporting workbook.
2. Fleet Description	The Fleet Description should detail all vehicles impacted under the project. Please only fill out shaded cells highlighted blue with a diagonal pattern (///). For third-party applicants, please list ALL school districts in this one worksheet. You do NOT need to make a separate worksheet for each school district. This Fleet Description is broken into two sections: 1) Current Vehicle Information and 2) New Vehicle Upgrade Information. The sheet has capacity for 100 vehicles. Please refer to the Fleet Description data definitions on tab 4 (Data Dictionary) for additional guidance on each field.
3. EV Infrastructure	The EV Infrastructure Description should detail all electric vehicle supply equipment (EVSE) and supporting infrastructure purchased under the project. For third-party and large school districts applicants, the EV Infrastructure needs to be listed by school district and/or city. That is, if School District A and School District B are procuring the same EVSE, the EVSE Equipment Information will appear as two separate EV Infrastructure Groups. Similarly, for large school districts, if EV infrastructure is being installed in two different locations, the EVSE equipment information needs to appear as two separate EV Infrastructure Groups. The EV Infrastructure worksheet should be updated quarterly as EVSEs are procured and installed. Please only fill out shaded cells highlighted blue with a diagonal pattern (///); however, additional rows may be added as needed to capture all EVSEs. Please refer to the EV Infrastructure data definitions on Tab 4 (Data Dictionary) for data field definitions. Reminder: All Level 2 EVSEs must be ENERGY STAR certified. All EVSE must comply with Build America, Buy America (BABA) requirements.
4. Data Dictionary	Please refer to the dictionary on this tab for support in completing the Fleet Description (Tab 2) and EV Infrastructure (Tab 3).

--

The Fleet Description should detail all vehicles impacted under the project. The Fleet Description should include all vehicles owned by third-party applicants, please list ALL school districts in this one worksheet. You do NOT include vehicles in the Upgrade Information. The sheet has capacity for 100 vehicles. Please refer to the Fleet Description Worksheet for more information.

Below are three tables (3-5). Please complete all three. The EVSE Equipment Information (Table 21) should include information on solar generation systems and Table 4 on battery storage systems. For all three tables, third-party and large school districts, if the same EVSE, the EVSE will appear as two separate EVSE Groups. Similarly, for large school districts, if EVSEs are updated semi-annually as EVSEs and supporting infrastructure are procured and installed. Please only fill in the EV Infrastructure data definitions on Tab 11 (Data Dictionary) for data field definitions. Reminder: Please comply with Build America, Buy America (BABA) requirements. See below for more information on BABA.

On November 15, 2021, the Infrastructure Investment and Jobs Act ("IIJA"), Pub. L. No. 117-58, which includes provisions for the iron, steel, manufactured products, and construction materials used in infrastructure projects are part of an infrastructure project, regardless of whether or not the infrastructure project was the primary basis for the infrastructure project. For more information, please visit <https://www.epa.gov/cwsrf/build-america-buy-america>.

EV Infrastructure Description

Instructions

Provide detail all electric vehicle supply equipment (EVSE) and supporting infrastructure purchased by school districts applicants, the infrastructure needs to be listed by school district and/or city. If EVSE are being installed in two different locations, the EVSE needs to appear as two separate rows. Use light blue shaded cells highlighted blue with a diagonal pattern (///); however, additional rows may be added. All Level 2 EVSEs must be ENERGY STAR certified. All EVSE, on-site power generation systems

Build America, Buy America (BABA) requirements

The Build America, Buy America Act (BABA), Public Law 117-58, §§ 70901-52, was signed into law and is in effect. If award recipient will be installing, upgrading, or replacing "infrastructure" under the award. Additionally, BABA requirements apply even if the award recipient will be using an American-made product.

Table 3. EVSE Equipment

Fields: Please refer to the following data field dictionary for support in completing tabs 2 and 3

2. FLEET DESCRIPTION

Current Vehicle Information

Basic Vehicle Information

Enter the VIN number for each vehicle.

Enter the manufacturer of the existing vehicle.

Enter the model of the existing vehicle.

Enter the model year of the existing vehicle.

Select the type of fuel that is currently being used (prior to upgrade).

Enter the Engine Family name of the existing Engine. NOTE: unregulated engines will not have an Engine Family Name. If unregulated, then NA

Enter the gross vehicle weight rating (GVWR) of the existing vehicle.

Select from the dropdown menu the bus.

Enter the existing bus's current odometer reading, in miles.

Enter the average number of vehicle miles traveled per year per vehicle.

Enter the average number of hours the vehicle idles per year.

Enter the amount of fuel used in gallons/year.

Enter the remaining life of baseline engine/vehicle in years at the time of the upgrade action.

Select a vehicle disposition option.

Select the outcome of a scrappage waiver request if applicable.

Basic Fleet Information

Enter the first and last name and email address of the individual or organization that owns the fleet.

Enter the name of the school district in which the bus to be scrapped, sold, or donated has operated in.

Enter the name of the National Center for Education Statistics (NCES) ID associated with the school district in which the bus to be scrapped, sold, or donated has operated in. If you are unsure of the district's NCES ID, you can search for the district at <https://nces.ed.gov/ccd/districtsearch/>.

Select the two letter postal code for the state in which the bus to be scrapped, sold, or donated has operated in.

Enter the county in which the bus to be scrapped, sold, or donated has operated. If it has operated in multiple counties, record all and separate using a colon (e.g., Polk: Butler).

Enter the city in which the bus to be scrapped, sold, or donated has operated in.

Enter the zip code in which the bus to be scrapped, sold, or donated has operated in. If it has operated in multiple zip codes, record all and separate using a colon (e.g., 50190 : 50191).

Enter the percent of time the bus to be scrapped, sold, or donated has operated in each county. If there is more than one. separate using a colon (Polk - 80%: Butler 20%).

New Replacement Vehicle Information

Upgrade Vehicle Information

Enter the year the upgrade happened.

Enter the vehicle identification numbers (VIN) of the new vehicle.

Enter the manufacturer of the new vehicle.

Enter the model of the new vehicle.

Enter the model year of the new vehicle.

Enter the engine family name of the new vehicle.

Select the fuel type of the new vehicle.

Enter the gross vehicle weight rating (GVWR) of the new vehicle.

Enter the cost of vehicle in dollars per unit.

Enter the federal funds expended per vehicle in dollars per unit.

New Vehicle Annual Data

Enter the new average number of idling hours for the new engine.

Enter the average number of vehicle miles traveled per year per new vehicle.

Enter the new annual fuel volume, in gallons/year for propane or CNG only.

Select yes or no to specify whether the vehicle is equipped with an auxiliary heater.

If bus has an auxiliary heater, enter the type.

Zero Emission Vehicle Data

Select yes or no into the cell to specify whether the vehicle is capable of bidirectional charging.

Enter the estimated range in miles for the zero-emission vehicle.

Enter the battery capacity in kilowatt-hours for the zero-emission vehicle.

Select yes or no into the cell to specify whether the vehicle battery warranty is included.

If the battery includes a warranty, indicate the number of years the coverage is valid for

If the battery includes a warranty, indicate the number of miles the coverage is valid for

Enter the total kWh of battery discharge

Select yes or no into the cell to specify whether a powertrain battery warranty is included.

If the powertrain includes a warranty, indicate the number of years the coverage is valid for

If the powertrain includes a warranty, indicate the number of miles the coverage is valid for

Select yes or no into the cells it specify whether the vehicle is equipped with telematics.

Select yes or no.

Enter First and Last name and email address.

New Vehicle Fleet Information

Enter the first and last name and email address of the individual or organization that owns the fleet.

Select yes or no.

Enter the name of the school district in which the new bus will operate in. If it will operate in multiple school districts, list all and separate with a colon (e.g., Hampton School District: Edgewood School District).

Enter the name of the National Center for Education Statistics (NCES) ID associated with the school district in which the new bus will operate in. If it will operate in multiple school districts, list all NCES IDs and separate with a colon (e.g., 1234567: 7654321).

Select yes or no.

Enter the percent of time the new bus will operate in each county. If there is more than one, separate using a colon (Polk 80%: Butler 20%)

3. EV INFRASTRUCTURE

EVSE Equipment Information

Enter the type of charger, either Level 2 (AC charging up to 19.2 kW) or DC Fast Charging.

Confirm and select yes if applicable. Please see <https://www.energystar.gov/>

Enter the manufacturer of the charging equipment

Enter the model name of the charging equipment.

Enter the year the charging equipment was manufactured.

Select an option. EVSE manufactured on or after July 1, 2024 must be meet BABA requirements.

Enter the maximum power output of the charging equipment, measured in kilowatts.

Enter the number of plugs installed on each unit of the charging equipment.

Select yes or no into the cell to specify whether the charging equipment is capable of bidirectional charging.

Select yes or no into the cell to specify whether the buses and charging equipment will be used for vehicle-to-grid (V2G) services.

Enter the quantity of charging equipment unit

Enter the cost of the charging equipment per unit.

Enter the total Federal funds expend for charging equipment per unit.

No action - autopopulated

Enter the date on which the EVSE is permanently affixed.

Location of EV Infrastructure

Select the two letter postal code for the state in which the charging equipment will be located.

Enter the county in which the charging equipment will be located.

Enter the city in which the charging equipment will be located.

Enter the zip code in which the charging equipment will be located.

Enter the street address in which the charging equipment will be located.

Enter the name of the school district or organization that owns the charging equipment.

Select yes or no

Enter the name of the school district in which the EVSE will serve. If it will serve multiple school districts, list all and separate with a colon (e.g., Hampton School District: Edgewood School District).

Enter the name of the National Center for Education Statistics (NCES) ID associated with the school district in which the EVSE will serve. If it will serve multiple school districts, list all NCES IDs and separate with a colon (e.g., 1234567: 7654321).

Infrastructure Installation Information

Enter the total installation costs for the charging equipment for the EV infrastructure group column.

Enter the total Federal funds expended for installation costs for the charging equipment for the EV infrastructure group column.

Please enter yes or no into the cell to specify whether the indicated cost of the charging equipment above includes any installation expenses.

Enter a description of the work performed to install the charging equipment, such as design and engineering, trenching, wiring and electrical upgrades, labor, and permitting.

Enter the name(s) of the organization(s) that performed the installation work described above.

Select electrician category

If a waiver is being used to meet BABA compliance requirements, select the waiver type

Automated cell that will calculate the total Federal Funds expended for the charging equipment and installation for an EV Infrastructure Group.

On-Site Power Generation Equipment Information

Select a type of energy generation, solar or wind.

Enter the generation capacity of the system as either kW or MW. Please indicate unit of measurement.

Battery Energy Storage System (BESS) Equipment Information

Select a type of battery

Enter the generation capacity of the system as either kWh or MWh. Please indicate unit of measurement.
