

**U. S. Environmental Protection Agency
Diesel Emissions Reduction Act (DERA) Grant Program
Supplemental Application Template**

Burden Statement for EPA Form: 5900-681

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2060-NEW). Responses to this collection of information are voluntary (2 CFR 200 at 2 CFR 1500). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 8.6 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

Instructions

This supplemental application template should be submitted at the time of award application to summarize the overview of the proposed project. Please work with relevant parties (i.e., transportation contractor, port authority, etc.) to ensure information submitted is accurate. Applicants only need to fill out shaded cells highlighted blue with a diagonal pattern (///). Cells highlighted yellow are simply for informative purposes and/or automated from other tabs in this spreadsheet. Fields that are optional at the time of application are shaded white and each field is labeled as such; applicants are encouraged to supply this information if it readily available, but it is not required. Additional fields may autopopulate with bold diagonal patterns (///), indicating that a response to those fields is not necessary, based on prior responses entered. Please complete tabs in this workbook according to the instructions below.

<u>Excel Workbook Tab</u>	<u>Definition</u>
1. Instructions	Basic instructions for all worksheets in this reporting workbook.
2. Fleet Description	The tab should be completed based upon the proposed workplan fleet sheet submitted as part of the DERA application. Please refer to additional information on field definitions in tab 4 (Data Dictionary).
3. Infrastructure	The tab should be completed based upon the proposed workplan submitted as part of the DERA application. Please refer to additional information on field definitions in tab 4 (Data Dictionary).
4. Data Dictionary	Please refer to the dictionary on this tab for support in completing the Fleet Description (tab 2) and Infrastructure Description (tab 3).

U. S. Environmental Protection Agency
Diesel Emissions Reduction Act (DERA) Grant Program
Fleet Description

INSTRUCTIONS: This Fleet Description should detail all vehicles and engines impacted under the project. The fields below align with EPA's Diesel vehicle and engine upgrades completed. This Fleet Description is broken into two sections: 1) Current Vehicle and Engine Information and 2) New vehicle and engine upgrades. Please refer to the Fleet Description data definitions on tab 4 (Data Dictionary) for additional guidance on each field. Each vehicle/engine group column below can represent one or more similar pieces of equipment operating in the same fleet. You can copy and paste rows as needed. Note: Individual marine vessels must be listed in separate vehicle/engine group columns. If both auxiliary and propulsion engines on an individual

tionary for support in completing tab 2 (Fleet Description) and tab 3 (Infrastructure).
2. FLEET DESCRIPTION
CURRENT VEHICLE AND ENGINE UPGRADE INFORMATION
Basic Fleet Information
Enter the group name of the fleet.
Enter the first and last name of the individual or organization that owns the fleet.
If the vehicles are part of a public fleet or benefit the public (i.e. a private school bus company contracted by a public school; drayage vehicles that serve a port; private construction equipment contracted to a public works project, etc) enter "Publicly", otherwise enter "Privately".
Enter the next four fields for each vehicle's place(s) of performance.
Enter the two letter postal code for the state in which the vehicle(s) will operate.
Enter the county in which the vehicle(s) will operate.
Enter the city in which the vehicle(s) will operate.
Enter the zip code which the vehicle(s) will operate.
Enter the percent of time the vehicle group operates in each zip code, if there is more than one. For example, 80% of time in 85310 and 20% of time in 85308.
Enter the vehicle type from the dropdown, OnRoad Vehicle, NonRoad Equipment, Locomotive, or Marine.
Select the target fleet from the dropdown menu.
Select from the dropdown menu the Vehicle/Equipment Class for onroad vehicles, as appropriate.
Using the drop down, enter the sector associated with the vehicle or engine group.
Select the vocation type from the dropdown menu.
Current Vehicle Information
Enter the Serial number or VIN number for each engine or vehicle
Enter the manufacturer of the existing vehicle
Enter the model of the existing vehicle
Enter the model year of the existing vehicle.
Current Engine Information
Enter the engine Serial # for each vehicle or engine to be scrapped/replaced.
Enter the manufacturer of the existing Engine.
Enter the model of the existing Engine.
Enter the model year of this engine set.
For REPOWERS AND UPGRADES ONLY, Select from the dropdown menu the Current Tier Level.
For tier 4 only engines, please use the drop down to indicate interim for final.
Enter the appropriate drop down for collection on emission control technologies for the current engine.
Enter the average horsepower of the engine/equipment.
Enter the engine displacement per cylinder in liters.
Enter the number of cylinders per engine.
Enter the engine displacement per cylinder in liters.
Enter the Engine Family name of the existing Engine. NOTE: unregulated engines will not have an Engine Family Name. Engine Optional for Idle Reduction, Aerodynamic Technology, Low Rolling Resistance Tires, and Fuels projects.
Select the type of fuel that is currently being used (prior to any clean diesel activity change).
Enter the total number of propulsion engines on the vessel.
Enter the total number of auxiliary engines on the vessel.
Current Annual Vehicle Data
Enter the amount of fuel used in gallons/year.
Enter the average number of hours the equipment is used per year.
Enter the average number of vehicle miles traveled per year per vehicle.
Enter the average number of hours the vehicle idles per year.
Enter the average number of hoteling hours per year, per engine.
Enter the remaining life of baseline engine/vehicle in years at the time of the upgrade action
NEW VEHICLE AND ENGINE UPGRADE INFORMATION
Upgrade Information
Enter the year in which the upgrade will take place (i.e., if in 2010, you're replacing a 1995 bus with a 2007 bus, the upgrade year is 2010.)
Enter the type of upgrade that will take place from the dropdown menu.
Using the drop down, enter the specific type of upgrade that will take place during the project.
Using the drop down list provided, select the appropriate vehicle class (for onroad vehicles only).
Please enter the vehicle identification numbers for the new vehicle(s) being replaced.
Automated cell that will sum the upgrade equipment cost (row 55) and labor cost (row 56).
Enter the cost of the technology or equipment cost per unit.
Enter the cost of installing or labor cost of the technology per unit.

Enter the federal funds expended in dollars per unit.
Automated cell that will calculate the federal cost share based upon the federal funds expended entered in row 57.
New Engine Information
For REPLACEMENTS AND REPOWERS ONLY, Enter the model year of the new vehicle/engine.
For REPLACEMENTS, REPOWERS AND UPGRADES ONLY, Select from the dropdown menu the new Tier Level.
For tier 4 only engines, please use the drop down to indicate interim for final.
Enter the appropriate drop down for collection on emission control technologies for the new engine.
Enter the new horsepower of the engine or equipment.
Please enter the new engine duty cycle - for line-haul locomotive ONLY.
Enter the new engine displacement per cylinder in liters.
Select from the dropdown menu the displacement per cylinder in liters.
Enter the number of cylinders in the new engine.
For REPLACEMENTS AND REPOWERS ONLY, Enter the Engine Family Name of the new engine.
Select the type of fuel that is for the new engine or vehicle.
New Annual Vehicle Data
For IDLE REDUCTION STRATEGIES ONLY, Enter the average number of idling hours reduced for the engine.
Enter the average number of hoteling hours per year, per engine.
Please enter the new annual fuel volume, in gallons. New Annual Fuel Volume should be from new engine efficiency, not changes in use.
3. INFRASTRUCTURE
EVSE Equipment Information
Enter the type of charger, either Level 2 (AC charging up to 19.2 kW) or DC Fast Charging.
Confirm and select yes if applicable. Please see https://www.energystar.gov/
Enter the manufacturer of the charging equipment
Enter the model name of the charging equipment.
Enter the year the charging equipment was manufactured.
Select an option. EVSE manufactured on or after July 1, 2024 must be meet BABA requirements.
Enter the maximum power output of the charging equipment, measured in kilowatts.
Enter the number of plugs installed on each unit of the charging equipment.
Select yes or no into the cell to specify whether the charging equipment is capable of bidirectional charging.
Select yes or no into the cell to specify whether the buses and charging equipment will be used for vehicle-to-grid (V2G) services.
Enter the quantity of charging equipment unit
Enter the cost of the charging equipment per unit.
Enter the total Federal funds expend for charging equipment per unit.
No action - autopopulated
Enter the date on which the EVSE is permanently affixed.
Location of EV Infrastructure
Select the two letter postal code for the state in which the charging equipment will be located.
Enter the county in which the charging equipment will be located.
Enter the city in which the charging equipment will be located.
Enter the zip code in which the charging equipment will be located.
Enter the street address in which the charging equipment will be located.
Enter the name of the school district or organization that owns the charging equipment.
Select yes or no
Enter the name of the school district in which the EVSE will serve. If it will serve multiple school districts, list all and separate with a colon (e.g., Hampton School District: Edgewood School District).
Enter the name of the National Center for Education Statistics (NCES) ID associated with the school district in which the EVSE will serve. If it will serve multiple school districts, list all NCES IDs and separate with a colon (e.g., 1234567: 7654321).
Infrastructure Installation Information
Enter the total installation costs for the charging equipment for the EV infrastructure group column.
Enter the total Federal funds expended for installation costs for the charging equipment for the EV infrastructure group column.
Please enter yes or no into the cell to specify whether the indicated cost of the charging equipment above includes any installation expenses.
Enter a description of the work performed to install the charging equipment, such as design and engineering, trenching, wiring and electrical upgrades, labor, and permitting.
Enter the name(s) of the organization(s) that performed the installation work described above.
Select electrician category
If a waiver is being used to meet BABA compliance requirements, select the waiver type
Automated cell that will calculate the total Federal Funds expended for the charging equipment and installation for an EV Infrastructure Group.
re Power Equipment Information and Demand Overview
Select the type of shore power connection, either high-voltage (HVSC) or low-voltage (LVSC).

Select the total voltage provided from the dropdown menu, if listed.
Enter the total voltage service provided if the amount is not listed in the dropdown menu.
Enter the manufacturer of the shore power system.
Enter the model name of the shore power system.
Enter the year the shore power system was manufactured.
Select the typical engine tier of vessels using the shore power system.
Select the fuel type of vessels using the shore power system.
Enter the number of annual vessel calls per berth where the shore power system is installed.
Enter the number of vessel berths that can be served by the shore power system.
Enter the maximum power output of the shore power system, measured in kilowatts.
Enter the estimated total annual energy output of the shore power system in megawatt-hours.
Enter the number of available plugs per shore power pedestal installed.
Enter the total number of shore power pedestals installed.

Location of Shore Power Infrastructure

Select the state where the shore power system is installed.
Select the county where the shore power system is installed.
Enter the name of the city where the shore power system is installed.
Enter the zip code of the location where the shore power system is installed.
Enter the name of the port facility where the shore power system is installed.
Enter the name of the organization that owns the shore power system.

Installation Details

Enter the total cost for installation of the shore power system.
Enter the total amount of federal funds expended for installation of the shore power system.
Select whether or not the equipment cost includes installation of the shore power system.
Describe the work done during installation, including all equipment that became part of the installed shore power system.
List the name of the company (or companies) performing the installation of the shore power system.
Enter the date (or date range) the shore power system was installed.
Enter the date by which the shore power system became fully operational.
Select from the dropdown menu how BABA requirements are being met for the shore power project.

Select from the dropdown menu which parts of the shore power project are BABA compliant.
For the previous column, explain which parts are not compliant or enter N/A.

Shore Power Cost Summary

Enter the equipment cost for each shore power pedestal.
Enter the federal funds expended for the equipment in each shore power pedestal.

No action - autopopulated

No action - autopopulated

No action - autopopulated

Optional Participation in Future Transportation Research

Select from the dropdown menu if EPA or its partners may contact you regarding shore power research.
If you selected "Yes" for the previous column, please enter your name and e-mail.
