

2024 Production Practices Report Respondent Booklet

Every year USDA conducts the Agricultural Resource Management Survey (ARMS). The survey gathers information on production practices, nutrient and fertilizer use, tillage practices, and pest management practices for different commodities each year.

A USDA representative from NASDA (National Association of State Departments of Agriculture) will work with you in person to collect your responses. During the interview, our representative will ask you several detailed questions about the types of pesticides you use on your crops. To make the interview process go faster, please have your spray records available. If you used a commercial chemical company, please make sure those records are accessible.

This booklet will help you and our representative find and record the correct pesticide products. The booklet lists registered label names of products, along with their Environmental Protection Agency (EPA) registration number. If you do not find the correct product listed in this booklet, record where the product was purchased or as much information about the product as possible.

Your participation is important. By responding to this survey, you can help USDA compile an accurate picture of farming in the United States. This will ensure that decisions impacting the well-being of farms are based on accurate, timely information.

Your data is confidential. The results of this survey will be combined with other responses, ensuring that no individual operation or producer can be identified, as required by federal law.

Thank you for participating and for your support of our programs and U.S. agriculture. If you have any questions, please feel free to contact us at 1-888-424-7828, or visit:

<http://www.nass.usda.gov/go/arms>.

Sincerely,

Joseph L. Parsons
Chair, Agricultural Statistics Board
