__Request not covered by 5 USC 9101

INV 44, Removal of field:

Position Requiring Investigation

1. Need for the Information Collection

The information collected on the General Request for Investigative Information (INV 40), Investigative Request for Employment Data and Supervisor Information (INV 41), Investigative Request for Personal Information (INV 42), Investigative Request for Educational Record Data (INV 43), and Investigative Request for Law Enforcement Data (INV 44) forms is necessary to obtain background information and personal records for investigating and determining an individual's initial or continued: eligibility for access to classified national security information or assignment to positions with sensitive duties, suitability for enlistment or appointment into military service, suitability for federal employment, fitness for assignment to work under contract for or on behalf of the government, or eligibility for physical or logical access to U.S. Government systems or facilities. This collection of information by the Defense Counterintelligence and Security Agency (DCSA) is authorized by Section 925 of Public Law 115-91, 5 U.S.C. 301, 5 CFR 736, and Executive Order 13467, as amended by Executive Order 13869. The INV Form 44 facilitates DCSA's collection of criminal history record information authorized by 5 U.S.C. 9101.

2. Use of the Information

The INV 40, 41, 42, 43, and 44 forms are used to collect information from a multitude of record sources to support federal background investigation and personnel vetting processes such as: investigations and determinations of eligibility for access to classified national security information, and for access to special access programs; suitability for federal employment; fitness of contractor personnel to perform work for or on behalf of the U.S. Government; and Homeland Security Presidential Directive (HSPD)-12 determinations for Personal Identity Verification (PIV) credentials to gain logical or physical access to government facilities and systems.

The content of the INV forms is also designed to meet notice requirements for personnel investigations specified by 5 C.F.R. 736.102(c). These notice requirements apply to any "investigation . . . to determine the suitability, eligibility, or qualifications of individuals for Federal employment, for work on Federal contracts, or for access to classified information or restricted areas." None of the forms are used for any purpose other than a personnel background investigation, as described above.

Procedurally, the subject of a personnel background investigation discloses the identity of relevant sources, such as supervisors, coworkers, neighbors, friends, current or former spouses, instructors, relatives, or schools attended on the Standard Form (SF) 85, Questionnaire for Non-Sensitive Positions; the SF 85P, Questionnaire for Public Trust Positions; or the SF 86, Questionnaire for National Security Positions. The INV forms are distributed to the provided source contacts identified on the standard form questionnaire through an automated mailing operation.

The INV 40 is used to collect records from a Federal or State record repository or a credit bureau. The INV 44 is used to collect law enforcement data from a criminal justice agency. The INV 41, 42, and 43 are sent to employment references, associates, and educational institutions. The INV 40, 41, 43, and 44 contain the subject's full name, date of birth and full

SSN. The INV 42 does not include the subject's SSN or DOB. The forms disclose that the source's contact information was provided by the subject to assist in completing a background investigation regarding the subject's eligibility for employment or security clearance, and request that the source complete the form to help in this determination.

The INV forms are completed, hardcopy, by the noted source; then returned, in a self-addressed envelope, to the DCSA investigations processing center. The completed forms are maintained by DCSA subject to the provisions of the Privacy Act of 1974, as amended, and the DUSDI-02 Personnel Vetting Records System SORN.

3. Use of Information Technology

Zero percent of forms are submitted electronically. Once completed, forms are returned to DCSA, and data is extracted using an automated bar code scanning procedure. The scanning procedure is leveraged to preserve data integrity and accuracy, and to ensure the efficient transfer of the information collected into DCSA systems. The forms are subject to the Government Paperwork Elimination Act (GPEA). However, they are not posted on DCSA's website because the forms contain individually pre-printed information. Therefore, it is not practical, due to privacy considerations, to access the forms through the DCSA public website.

4. Non-duplication

The information obtained through this collection is unique and is not already available for use or adaptation from another cleared source.

5. Burden on Small Businesses

This information collection does not impose a significant economic impact on a substantial number of small businesses or entities.

The INV 41 may be provided to small businesses that employ or that have employed the subject of the investigation. The collection is brief and voluntary to minimize burden. The estimated time for response is 5 minutes.

6. Less Frequent Collection

DCSA's ability to conduct effective written investigative checks would be compromised absent the use of the INV forms. Furthermore, the forms allow for the written collection of data. If DCSA did not utilize these information collections, DCSA would otherwise have to conduct in-person interviews which would increase the cost of investigative products, and DCSA would potentially not be operating in compliance with OPM and ODNI Federal Investigative Standards.

None of the forms are used for any purpose other than those described above.

7. Paperwork Reduction Act Guidelines

This collection of information does not require collection to be conducted in a manner inconsistent with the guidelines delineated in 5 CFR 1320.5(d)(2).

8. Consultation and Public Comments

Part A: PUBLIC NOTICE

A 60-Day Federal Register Notice (FRN) for the collection published on Monday, March 18, 2024. The 60-Day FRN citation is 89 FR 19305 .

No comments were received during the 60-Day Comment Period.

A 30-Day Federal Register Notice for the collection published on Thursday, June 6, 2024. The 30-Day FRN citation is 89 FRN 48412.

Part B: CONSULTATION

No additional consultation apart from soliciting public comments through the Federal Register was conducted for this submission.

9. Gifts or Payment

No payments or gifts are being offered to respondents as an incentive to participate in the collection.

10. Confidentiality

The INV 40, INV 41, INV 42, INV 43, and INV 44 include a Privacy Act Statement at the top of each form. The statement indicates that the forms are in full compliance with 5 U.S.C. 552a (the Privacy Act of 1974) and other laws protecting the rights of the respondent. Further, the forms note that the information provided by the respondent, including the identity of the respondent, may be disclosed to the respondent upon request. Additionally, the INV 41 and INV 42 provides instructions to respondents allowing the respondents to keep his or her identity confidential, in compliance with Title 5 Code of Federal Regulations, Part 736.102(c).

The INV 40, INV 41, INV 42, INV 43, and INV 44 are covered by the DUSDI-02 – Personnel Vetting Records System SORN, which can be accessed at the following link:

<https://www.federalregister.gov/documents/2018/10/17/2018-22508/privacy-act-of-1974-system-of-records>

This information collection is maintained in an IT system that does require a Privacy Impact Assessment (PIA). The applicable approved PIAs for the Personnel Investigations Processing System (PIPS) and the PIPS Imaging System (OPIS) are provided with this package for OMB's review.

The applicable Records Retention and Disposition Schedules is: DAA-0446-2019-0004.

11. Sensitive Questions

A SSN Justification Memo is included in the package for this collection. It details the applicable Acceptable Use Cases in accordance with DoDI 1000.30 and is currently under review by the Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency.
