Routine Customer Feedback” (OMB Control Number: 0920-1071)**

TITLE OF INFORMATION COLLECTION: BEAM Dashboard User Feedback Survey

PURPOSE: This project aims to collect user feedback for CDC NCEZID’s BEAM (Bacteria, Enterics, Amoeba, and Mycotics) Dashboard. BEAM Dashboard is an interactive tool to access and visualize data from the System for Enteric Disease Response, Investigation, and Coordination (SEDRIC), which CDC uses to coordinate surveillance and response to enteric disease outbreaks. BEAM Dashboard provides the public, academia, industry, public health partners and regulatory agencies with timely data on pathogen trends and serotype details to inform work to prevent illnesses from food, water, the environment, and animal contact. Launched in 2022, the first version of the dashboard focuses on data for Salmonella, E.coli and Shigella bacteria. As CDC aims to expand data available in BEAM to include additional pathogens, antimicrobial resistance data, and epidemiologic data from outbreak investigations, it is important to gather user feedback from versions 1 for consideration during future enhancements

DESCRIPTION OF RESPONDENTS: Survey respondents will be individuals who have visited the BEAM Dashboard public website and wish to voluntarily provide anonymous feedback. We anticipate respondents to be members of the public, public health professionals, academic partners, or industry partners.
