Instructions for Spreadsheet Template

Purpose:

This spreadsheet template was designed by the U.S. EPA to facilitate semiannual reporting for process unit equipment affected by the Source Performance Standard for Crude Oil and Natural Gas Facilities Constructed, Modified, or Reconstructed after September 18, 2015.

Electronic reporting:

Electronic submission of semiannual reports through the EPA's Compliance and Emissions Data Reporting (CEDRI) is required. CEDRI is available through the Central Data Exchange (<https://cdx.epa.gov>).

Confidential Business Information:

Do not submit confidential business information (CBI) to EPA via CEDRI. EPA will make all the information submitted through CEDRI available to the public. All CBI claims must be asserted at the time of submission. Anything submitted using CEDRI cannot later be claimed to be confidential, and EPA is required to make emissions data available to the public. Thus, emissions data submitted through CEDRI is not entitled to confidential treatment, and EPA is required to make emissions data available to the public. Thus, emissions data submitted through CEDRI is not entitled to confidential treatment, and EPA is required to make emissions data available to the public.

Although we do not expect persons to assert a claim of CBI, if persons wish to assert a CBI claim for some of the information submitted through CEDRI and submit a complete report, including any information claimed to be CBI, to EPA. The preferred method for submitting CBI is by email attachments, File Transfer Protocol, or other online file sharing services. Electronic submissions must be transmitted directly to the attention of the Oil and Gas Sector Lead. If assistance is needed with submitting large electronic files that exceed the file size limit of the file sharing service, please email oaqpscbi@epa.gov to request a file transfer link. If you cannot transmit the file electronically, please mail the following address:

OAQPS Document Control Officer (C404-02)
OAQPS, U.S. Environmental Protection Agency
Attn: Oil and Gas Sector Lead
Research Triangle Park, North Carolina 27711

The mailed CBI material should be double wrapped and clearly marked. Any CBI markings should not show through the outer wrapping. Information not marked as CBI may be authorized for public release without prior notice. Information marked as CBI is not set forth in 40 CFR part 2.

Using this Template:

The CEDRI spreadsheet template upload feature allows you to submit data in a single report for a single site or multiple sites entered into the worksheet labeled "Site Information" in this Excel workbook. Each row in the "Site Information" worksheet must match the information on each tab to the appropriate site.

IMPORTANT: The final CEDRI upload file must be a single ZIP file, which must include this Excel workbook and any related information file found in the "Site Information" worksheet).

For each site record found in the "Site Information" worksheet, you may reference a single file attachment that includes a report, the uploaded files may be in any format (e.g., zip, docx, PDF). If you would like to include an Excel file(s) as an attachment, you must create a master ZIP file that will be uploaded into CEDRI.

For example, the file "2019Report.zip" uploaded into CEDRI may contain 2 files:

1. Completed_annual_reporting_spreadsheet_2019.xlsx
2. Attachments.zip

The "Attachments.zip" file could contain as many attachments of any format (xlsx, xls, docx, pdf, zip, etc.) as needed. If you only have one file to attach, you do not need to zip it unless it is an Excel file (.xlsx, .xls).

Template Navigation and Tabs to Complete:

The relevant regulatory citations are listed for each data element. Some data elements provide information that is not required for navigation (such as linked to conditional formatting) or may be needed for state or local reporting purposes (e.g., Response citation associated with them).

Within each worksheet, example rows are colored light orange (rows 14 through 23), and the XML tag row (row 13) is colored light blue.
