OMB Control No. 2070-NEW

P2 IIJA Communities EJ Grant Reporting Template

Welcome

Using this workbook will allow you to track all required reporting and outcome elements, automatically tabulate many of your required outputs, and submit your data for sequential annual reporting. Using this workbook will also allow EPA to easily import this information into its P2 Grants Database, which aggregates P2 grant performance information across the country. EPA is planning to make the P2 Grants database widely available through a searchable public website, which will allow other P2 providers and facilities to find demonstrated P2 practices and implemented P2 actions. By using this standardized workbook to report your results, you are helping to ensure that the database contains accurate, complete, and consistent data about P2 practices, which may allow others to replicate your successes. So, thanks!

Learn more at https://www.ena.gov/n2/grant-reporting

Use the tabs below from left to right. Full instructions appear on each tab:

- 1. The Grant Project Data tab combines data entry and an automatic list. On top is the data entry area for grant/grantee information. Below that is an autogenerated tracking list that will pull in business establishment names you've entered in the numbered business establishment tabs.
- 2. The Results Summary tab automatically aggregates results from data entered in the Partners tab, Outreach Activities tab, and the numbered business
- 3. The Partners tab is optional and provides a place to enter information about partners who helped strengthen your ability to provide P2 technical assistance to businesses in disadvantaged commu
- 4. The Outreach Activities tab is for capturing information about outreach activities, including training, webinars, videos, etc.
- 5. The Sample Business Establishment tab serves as an example of how to sufficiently enter project data on the numbered business establishment tabs

Getting Started

6. The numbered tabs are for data entry of business establishment-level data, one business establishment per numbered tab. While providing the business establishment name is optional, it is beneficial to do so because the Grant Project Data tab displays the name provided and associates it with its numbered tab, which will help you later when you need to find the correct tab for updating the status of follow-up, implementation and results achieved at a specific business establishment. This template has 75 numbered tabs for business establishments; please use a new file if you need more tabs.

EPA's P2 calculators are designed to help you measure environmental and economic outcomes from pollution prevention activities

For help with calculating Metric Tons of Carbon Dioxide Equivalent (MTCO.e), the required reporting unit for reductions in CO. and related greenhouse gases, please use the EPA P2 Greenhouse Gas Calculator. The calculator allows you to calculate your GHG reductions from electricity management, energy substitution (green energy), stationary sources, mobile sources, reduced water use, reduced chemical use, chemical substitution, and solvent remanufacturing. The calculator will also provide associated cost savings for the first five listed above (electricity management, green energy, stationary and mobile sources, and reduced water

Calculating Outcomes in the Numbered Tabs

For help with calculating cost savings, please use the P2 Cost Savings Calculator. This calculator allows you to calculate the annual net cost savings realized from avoiding fees and expenses from buying fewer hazardous inputs, shipping less hazardous waste, emitting fewer regulated air emissions, using less water, sending less wastewater through pre-treatment and treatment works, or buying less fuel or energy. It also allows you to calculate the cost differences of buying greener materials, fuel and energy. Users can use the tool to estimate prospective cost savings.

For help with calculating reductions in hazardous substances, pollutants, and contaminants, please use the P2 Calculator for Reductions in Hazardous Substances, Pollutants and Contaminants. This calculator has been expanded to cover all categories of pollutant and release reductions that EPA tracks and measures, including reductions in hazardous materials used, hazardous wastes, air emissions, water pollutants, and those achieved through solvent remanufacturing. To calculate pounds of water pollution that business establishments reduce; either use the business establishment's permit methodology or multiply wastewater gallons by 8.35 to get pounds and divide by 10,000 to eliminate water content. The calculator also provides fluid hazardous material densities for gallon-to-pound conversions

When your follow-up confirms a P2 recommendation was implemented...

- 1 In Column K of the numbered business establishment tab, enter "Y" (indicating, yes, that it was implemented at this business establishment) and in Column L include the date of implementation.
- 2 In Columns C J, enter updated cost, savings and outcome values. For calculating MTCO2e, cost savings, and reductions in hazardous substances, pollutants, and contaminants, see the section above on "Calculating Outcomes in the Numbered Tabs."
- 3 In Column N, enter quantity information associated with implementation and the unit used for MTCO2e conversion (kWh, BTU, etc.; see all units in P2 GHG Calculator).
- 4 In Column R, select "Y" if a case study covers this implemented action.
- 5 Please note: Columns C J values for a row will tally in a tab's Total row and in the Results Summary tab only if row 20 has a follow-up date, Column K has a "Y", and Column L has a date implemented.
- 6 If more steps of a recommendation get implemented in a second year, add phase 2 steps in a separate row and complete Columns C J.

Working with Numbered Tabs

When your follow-up confirms that a P2 recommendation has NOT yet been implemented...

- 1 Enter "N" in column K.
- 2 In Column P, enter "Y" if the business establishment plans to implement the recommendation within the next 5 years.
- 3 In Column Q, if the business establishment has no plans to implement the recommendation and can tell you why, enter the barrier(s) to implementation identified by the business establishment (e.g., high cost, not feasible, a regulatory barrier, etc.).

When cells are highlighted vellow...

1 On the numbered business establishment tabs, a cell will be highlighted yellow if your response is different than the expected input type (e.g., letters instead of numbers). Re-enter your response in the appropriate format to remove the highlighting.

Paperwork Reduction Act Burden Statement

Paperwork Reduction Act Burden Statement
This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2070-NEW), Responses to this collection of information are mandatory for certain persons, as specified at 42 U.S.C 13101 and 15 U.S.C.3701. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be approximately 20 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

P2 IIJA Communities EJ Grant Reporting Template

How to Use This Tab:	1. Enter Grant/Grantee information in the top section. The Recipient and Project Number information will automatically appear on the other tabs in this workbook. 2. The Business Establishments in the bottom section will be populated automatically as you fill out the numbered business establishment tabs. This list will help you later to find business establishments when updating the status of follow-up, implementation, and results achieved.

How to Use this Tab:

Use this tab to report on outreach activities, including training, webinars, videos, or other outreach.

1. List the title of each activity and identify the type of activity using the dropdown provided.

2. Enter the date of the event, if applicable. Include just the first ady for multi-day events.

3. Provide information on the topics covered and number of business established in attendance/reached.

4. If applicable, include a link to online content or attach the content created to the report submission.

The five sample records may be used as a guide.
