**Title:** Integrated Viral Hepatitis Surveillance and Prevention Funding for Health Departments Supplement

**Project Id:** 0900f3eb8208b070

**Accession #:** NCHHSTP-PB-1/13/23-8b070

**Project Contact:** Megan S Early

**Organization:** NCHHSTP/DVH/PB

**Status:** **Project Completed**

**Intended Use:** **Funding Determination**

**Estimated Start Date:** 06/01/2023

**Estimated Completion Date:** 04/30/2026

## Determinations

Determination	Justification	Completed	Entered By & Role
HSC: <b>DOES NOT INCLUDE</b> activities or tasks that meet the definition of research	<b>DOES NOT INVOLVE</b> Live Vertebrate Animal	1/24/23	Dodson_Janella R. (jhd7) CIO HSC
PRA: <b>PRA Applies</b>		1/24/23	Bonds_Constance (akj8) CTR OMB/PRA Coordinator

## Description & Funding

---

### Description

**Priority:** Standard  
**Date Needed:** 01/20/2023  
**Determination Start Date:** 01/13/23

**Description:** The purpose of this Supplemental NOFO is to increase the early detection and interruption of hepatitis C outbreaks and transmission clusters; and to increase access to the prevention, diagnosis, and treatment of hepatitis B and C among PWID and other individuals at increased risk for infection who seek services in high-impact settings. The activities are aligned with activities described in Integrated Viral Hepatitis Surveillance and Prevention Funding for Health Departments (CDC-RFA-PS21-2103).

**IMS/CIO/Epi-Aid/Lab-Aid/Chemical Exposure Submission:** No

**IMS Activation Name:** Not selected

**Primary Priority of the Project:** Not selected

**Secondary Priority(s) of the Project:** Not selected

**Task Force Associated with the Response:** Not selected

**CIO Emergency Response Name:** Not selected

**Epi-Aid Name:** Not selected

**Lab-Aid Name:** Not selected

**Assessment of Chemical Exposure Name:** Not selected

**Goals/Purpose** The purpose of this NOFO is to announce the availability of supplemental funding for the organizations that were previously awarded funding under Integrated Viral Hepatitis Surveillance and Prevention Funding for Health Departments (CDC-RFA-PS21-2103) (IVHSP). The primary goals of this Supplemental NOFO are to: 1) increase the early detection and interruption of hepatitis C outbreaks and transmission clusters; and 2) increase hepatitis B and hepatitis C diagnosis and treatment by providing routine testing and linkage to prevention and treatment in high-impact settings. This Supplemental NOFO includes two components and applicants may apply for one or both of the following components: Component 1: Integrating Genomic and Epidemiologic Surveillance for Outbreak Detection and Response. The purpose of this project is to work with health departments to develop an integrated epidemiological and molecular surveillance system for HCV infection to identify HCV transmission clusters and outbreaks for public health action. Component 2: Increasing Access to Hepatitis C and/or Hepatitis B Testing and Linkage to Care in High-Impact Settings. The purpose of this project is to work with partners to conduct testing and linkage to care for hepatitis B virus (HBV) and/or HCV infection in high-impact settings (e.g., syringe services programs or SSPs, substance use disorder treatment centers, correctional facilities, emergency departments, and sexually transmitted infections clinics).

**Objective:** The first component of the supplement includes three strategies/objectives: 1) Develop system for integrating genomic and epidemiologic surveillance for detection of HCV transmission clusters and for public health response in the jurisdiction, 2) Build jurisdictional capacity to integrate genomic surveillance into the existing epidemiological surveillance of HCV infections, and 3) Assess effectiveness of integrated genomic and epidemiologic surveillance to improve identification of HCV transmission networks. The second component of this supplement includes three primary strategies/objectives: 1) Increase routine HCV and/or HBV testing

in high-impact settings, 2) Provide linkage to treatment, and referral to prevention services in high-impact settings, and 3) Build public health laboratory capacity for HCV and/or HBV testing.

**Does your project measure health disparities among populations/groups experiencing social, economic, geographic, and/or environmental disadvantages?:** Not Selected

**Does your project investigate underlying contributors to health inequities among populations /groups experiencing social, economic, geographic, and/or environmental disadvantages?:** Not Selected

**Does your project propose, implement, or evaluate an action to move towards eliminating health inequities?:** Not Selected

## Funding
