

Paperwork Reduction Act Burden Statement

All federal agencies may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number. The OMB Control Number for this information collection is 2125-0545. Public reporting for this collection of information is estimated to be approximately 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, completing, and reviewing the collection of information.

All responses to this collection of information are voluntary. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Department of Transportation, Federal Highway Administration, 1200 New Jersey Ave SE, Washington, D.C. 20590.

National Household Travel Survey NextGen 2024: Retrieval Script (Web & CATI) – Main Study

General Documentation Notes:

- Orange heading indicate a new screen
- Blue heading indicates a new variable
- “Type” indicates the type of variable that will be collected
 - SelectSingle – Select one option from list provided
 - SelectMultiple – Select multiple option from list provided
 - NumberEntry – Number field within the range provided
 - TextEntry – Open text field
 - DropDown – Select one option from a drop down list
 - CalendarDropDown – Select a date from a calendar provided
 - Computed- Computed variable used in recalls – shown with © symbol.
 - GeoCodeAddress – Address search tool using Google Maps API
- ProgrammerNote provides the logic for when the question will be presented or any special instructions not already covered in the other specifications
- Because the survey is voluntary and respondents should not feel compelled to provide a response, options for “Don’t Know” and “Prefer not to answer (Refused)” will be available. To minimize non-response, these choices will not initially appear as answer choices on any screen presented to the respondent.
 - If a participant clicks “Next” on a page without answering a question they will receive a prompt noting that no answer was provided and presenting three options:
 - I meant to answer it (selecting this will direct the participant back to the unanswered question).
 - I don’t know
 - I prefer not to answer
- In CATI question text, the text in ALL CAPS is for instruction to the interviewer and should not be read out loud
- Text that is wrapped with square brackets and preceded by a dollar sign ‘\$’ denotes situations where the text varies based on roster row number and other context, e.g., [\$ARE_YOU] will be replaced with either “are you” or “is John Jr.”

Respondents who quit the survey prior to completion of all questions and return to finish at a later time will be presented a screen that welcomes them back to the survey and informs them that they will be returned to the place where they left the survey.

WEB	CATI
Welcome back. We see that [\$FNAME] has already started the survey, click "Next" to continue where they left off.	I see that [\$FNAME] has already started the survey; I'm going to pull up the survey where they left off.

DRAFT

Part 7: Post-Travel portion of Retrieval (back to WGS 102)

Programmer notes: R taken here after travel is reported for all HH members.

SELECTPERSON_DONE (Anchor page for TBW integration)

Developer Notes: This is a page with no questions.

TBW checks wgs.wgs_sessionpages to see if SELECTPERSON_DONE was ever hit for this sampno, if so do not include url parameter for pageName on "Take the Final Survey". If it wasn't ever hit, include pageName=SELECTPERSON_DONE.

Public site also needs to include &Navigation=Start to make sure that PIN box starts at beginning of RET so that Dashboard is hit

[Alternative plan: TBW checks Household.extendeddetails->>'SELECTPERSON_DONE', if it does not exist, add the URL parameter pageName=SELECTPERSON_DONE. If it does exist, do not include the URL parameter. TBW stores "SELECTPERSON_DONE" into Household.extendeddetails upon the pressing of "Take the Final Survey" and ... Vulnerable to disconnect between WGS and TBW (WGS goes down and doesn't record the history record, but TBW has marked that it has)]

Alternatively: Also considered This question gets filled by URL param incoming from TBW and is used by TBW to decide whether to include the pagename of SELECTPERSON_DONE as a URL param when calling to RET on "Take the Final Survey". TBW should check wgs.wgs_lookup_surveydata(102, <sampno>, 'SELECTPERSON_DONE') = '1'. Only include the pageName URL parameter if this value is null or not 1. The idea is, use history if you have it, otherwise come HERE - not to the beginning of RET. But this doesn't allow you to "return to start" to the dashboard
