Reason for Change	Burden Change
Template field was not being utilized, and its removal allowed for a more simplified form that translates between platforms more easily.	No
With the removal of the "Definition of Uncompensated Care" field, the form can utilize the built in Excel column headings to navigate data, rendering this row unnecessary.	No
Column headings were spread across three rows, complicating the form. This change simplifies that for ease of use of the data and for screen readers.	No

This column heading relates to the proposed addiitional data element in CMS-2445-P. The placement aligns with the proposed placement in the regulation.	Yes, this represents a proposed additional data element. The additional burden to produce this data point is reflected in the PRA package.
The form requires states (through their auditors) to list DSH hospitals, Institutes for Mental Disease, and Out of State Hospitals. In practice, submitters have added this text to the list of Hospital Names to denote the beginning of the list for IMDs. We are adding it officially to align with that practice.	No

This revision adds a name to the sheet with the Data Elements Report template, to differentiate the sheets of the template and assist users of screen readers.	No
We are adding a data dictionary we had provided to users of this template, to have available in one location. The data dictionary serves as a guide for how the cells of the DSH data elements report template should be populated, if required.	No
