

Justification for a Non-Material/Non-Substantive Change for 1218-0236-Regulations Containing Procedures for Handling of Retaliation Complaints

OSHA is requesting this non-substantive change to add a clean version of the new form that was discussed in the supporting statement to the currently approved request. During the submission of the clearance, there were a few personnel changes in the OSHA PRA office as well as the programs PRA office. This resulted in the wrong version of the retaliation complaint form from being submitted to OMB. The new form was inadvertently omitted from the submission and the clearance was submitted with the previous version of the form. However, the supporting statement fully explained what the program proposed to do under the new revised form. We are submitting both the mock-up form that explains the proposed updates as well as the clean version that will be used on their website. Your full consideration is appreciated.
