

Protocol: Virtual Employer Interviews

Opening Script

Thank you for taking the time to meet with me today. My name is _____ and my colleague's name is _____. We work for The Urban Institute/Mathematica/Social Policy Research Associates in Washington, DC/New Jersey/ California. We're part of the research team that is conducting the Evaluation of Registered Apprenticeship Initiatives funded by the U.S. Department of Labor. The purpose of the evaluation is to build and share evidence about registered apprenticeship initiatives.

We have about 30 minutes for our discussion. To inform the evaluation study, it is very important for us to speak to employers directly. Today, our goal today is to learn about your experience with apprenticeships in general. We believe the risks of participating in this study are minimal. While there are no direct benefits to you, we hope that the findings from this study will benefit those involved in operating and expanding apprenticeship by learning more about your involvement, experiences, and perceptions of apprenticeships and apprentices.

Your participation in this interview is voluntary and you may choose not to answer some or any of our questions. If you don't know the answer to a question, just let us know and we can move on. We will do everything we can to secure the privacy of the information you provide but ask that you consider using headphones or finding a private space to talk so that other people cannot hear or see this conversation.

My colleague and I will be taking notes in order to document what we hear during our discussion. We do not share these notes with anyone outside of our research team. We will destroy these notes after the end of our project. We will combine this information together with similar conversations we are having with other employer partners. Information or any quotes we use from our conversation will not identify you or your company by name or in a way that you or your company could be identified. I know you are busy, and I appreciate you taking the time for this conversation.

Do you have any questions for me?

Do I have your permission to record this conversation for our notes? This recording will not be shared outside of the research team and is used to improve the accuracy of our notes.

Do we have your consent to proceed with the discussion? [collect verbal consent]
