(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

Overview of This Information Collection

(1) *Type of Information Collection Request:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* USCIS Online Account Access.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* OMB-62; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary: Individuals or households.* In order to create a new USCIS Online Account, members of the public (i.e. users) must submit a valid email address; create a password; select their preferred method for interacting with a two-step verification process (authentication app, text message, or email); and provide responses to five password reset questions of their choice. Any given email address may be associated with only one USCIS Online Account; users may not establish multiple accounts using the same email address. A user is required to complete

a two-step verification process upon creation of a new account and during each subsequent log-in. USCIS makes use of the information received during the account creation process to set up the user's profile. Once the account is established/the user has logged in, the user can edit/add certain profile information or select a USCIS online system with which to interact.

The myUSCIS system's registrant account is being enhanced to allow companies to set up company administrator accounts with company and personal profiles and to file Form I-129 petitions in addition to H-1B Registrations. The company account will have functionality that allows a company administrator to invite company members to join a company group and collaborate on H-1B Registrations and Form I-129 petitions. Company members will complete a personal profile. The burden to respondents for creating company and personal profiles, and for creating and accepting/declining invitations to join a company group, is being captured under OMB Control Number 1615-0122.

USCIS systems currently accessible by logging in through the USCIS Online Account Access process are: myUSCIS, the Freedom of Information Act electronic request system (FIRST), and myE-Verify. These systems serve specific, unique purposes and may require the user to provide information beyond what is required to create an account/log in through the USCIS Online Account Access process. Each system may be considered a collection of information in its own right and be covered by its own OMB Control Number. USCIS may add additional online systems for public use in the future.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection USCIS Online Account Access process for Individuals or Households is 4,240,000 and the estimated hour burden per response is 0.167 hours; the estimated total number of respondents for the information collection USCIS Online Account Access process for Businesses or other for-profit is 1,060,000 and the estimated hour burden per response is 0.167 hours; the estimated total number of respondents for the information collection for Account Interactions is 300,000 and the estimated hour burden per response is 0.315 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual

hour burden associated with this collection is 979,600 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is \$0.
