U.S. citizenship is required for Research Assistant positions.

I. The Board's economics divisions study a wide range of topics, including but not limited to the following broad areas of economic analysis and policy:

Macroeconomics

(General macro, public finance, unemployment, inflation, growth, and productivity)

Microeconomics

(Consumer behavior, labor markets, public finance, urban and regional economics, health, education, natural resource economics, and industrial organization)

Financial Economics

(Money & capital markets, banking, asset pricing, derivatives, and regulation)

International Economics

(Trade, international finance, and development)

Computational Economics & Econometric Methods

(Algorithm development and simulation methods)

Economic Measurement

(Survey research, economic statistics, and national accounting)

Monetary Policy and Central Banking

(Money markets, monetary policy, and FR operations)

Many qualified Research Assistant candidates have no clear preference among the many areas of research done at the Board; however, for those who do, indicating such could be helpful to finding the best fit among the many different groups hiring research assistants. Please rank order the top 3, with 1 being the top, those broad areas of analysis that you are *most* interested in pursuing, or choose "no clear preference":
