

Request for Approval under the “Generic Clearance for the Center for Clinical Standards and Quality IT Product and Support Teams” (OMB Control Number: 0938-1397)

TITLE OF INFORMATION COLLECTION: Internet Quality Improvement and Evaluation System (IQIES) HCD User Research Form (CMS-10808)

PURPOSE OF COLLECTION:

What are you hoping to learn / improve? How do you plan to use what you learn? Are there artifacts (user personas, journey maps, digital roadmaps, summary of customer insights to inform service improvements, performance dashboards) the data from this collection will inform?

CMS developed the Quality Improvement and Evaluation System (QIES) over a decade ago to directly support provisions within the legislations. As time has progressed, the QIES system architecture has become outdated and expensive to maintain. As a result, CMS initiated a project to modernize QIES by developing the Internet Quality Improvement and Evaluation System (IQIES) as a replacement. IQIES is an Internet-facing system that utilizes industry standard technologies to deliver the capabilities that CMS has mandated. IQIES functional capabilities are divided into three major categories, Patient Assessments (PA), Survey and Certification (S&C) and Reporting. User research with the IQIES user community will help drive decisions about how to improve quality patient assessments and survey and certifications that are conducted.

The IQIES HCD User Research form is designed to collect user’s contact information in real time from site visitors who are willing to volunteer to participate in user research. The form will be available through a link on the IQIES website to provide users the opportunity to input their contact details to improve our system. This information will allow the IQIES HCD Research team to effectively conduct research and analysis, as well as assess the needs of their user experience. Information will be collected through a form using drop-down menus and open text fields. Demographic data will be collected to better understand the type of user, however no Personally Identifiable Information (PII) or Protected/Personal Health Information (PHI) will be included in the IQIES HCD User Research Form. Estimated time to complete form is less than 5 minutes.
