the public's reporting burden. It also
helps the public understand our

provide the requested data in the
desired format.

We are especially interested in public
comment addressing the following:

(1) Whether or not the collection of
information is necessary for the proper
performance of the functions of the
agency, including whether or not the
information will have practical utility;

(2) The accuracy of our estimate of the
burden for this collection of
information, including the validity of
the methodology and assumptions used;

(3) Ways to enhance the quality,
utility, and clarity of the information to
be collected; and

(4) How might the agency minimize
the burden of the collection of
information on those who are to
respond, including through the use of
appropriate automated, electronic,
mechanical, or other technological
collection techniques or other forms of
information technology, *e.g.*, permitting
electronic submission of response.

Comments that you submit in

public record. We will include or
summarize each comment in our request
to OMB to approve this ICR. Before
including your address, phone number,
email address, or other personal

your entire comment—including your
personal identifying information—may
be made publicly available at any time.
While you can ask us in your comment
to withhold your personal identifying
information from public review, we
cannot guarantee that we will be able to
do so.

Abstract: Reclamation is responsible
for approximately 6.5 million acres of
land which directly support
Reclamation's Federal water projects in
the 17 Western States. Under 43 CFR
part 429, individuals or entities wanting
to use Reclamation's lands, facilities, or
waterbodies must apply using Form 7–
2540. Examples of such uses are:

- agricultural uses such as grazing and
farming;
- commercial or organized recreation
and sporting activities;
- other commercial activities such as
“guiding and outfitting” and “filming
and photography;” and,
- resource exploration and extraction,
including sand and gravel removal
and timber harvesting.

We review applications to determine
whether granting individual use
authorizations are compatible with
Reclamation's present or future uses of
the lands, facilities, or waterbodies.
When we find a proposed use
compatible, we advise the applicant of

the estimated administrative costs and
estimated application processing time.
In addition to the administrative costs,
we require the applicant to pay a use fee
based on a valuation or by competitive
bidding. If the application is for
construction of a bridge, building, or
other significant construction project,
Reclamation may require that all plans
and specifications be signed and sealed
by a licensed professional engineer.
