SUPPLEMENTARY INFORMATION:

I. Abstract

This request would extend an approved information collection regarding Greater Atlantic Region fishing gear marking requirements. There are no changes to the gear marking requirements in this collection.

Under the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the Secretary of Commerce (Secretary) is responsible for the conservation and management of marine fishery resources. The Secretary has delegated much of this responsibility to the National Oceanic and Atmospheric Administration (NOAA)/National Marine Fisheries Service (NMFS). The Magnuson-Stevens Act gives the Secretary and NOAA certain regulatory authorities to ensure the most beneficial uses of marine fishery resources. One of the regulatory steps taken to carry out the conservation and management objectives is to collect data from users of the resource.

Regulations at 50 CFR 648.84(a),(b), and (d), 648.125(b)(3), 648.144(b)(1), 648.264(a)(5), and 697.21(a) and (b) require Federal permit holders using certain types of fishing gear to mark the gear with information necessary to identify the vessel and gear (e.g., hull identification number, Federal fishing permit number). The regulations also specify gear marking requirements for visibility (e.g., buoys, radar reflectors). These gear marking requirements aid in fishery law enforcement, support safe navigation by increasing gear visibility, and help prevent gear conflicts by providing gear type information to other fisherman.

The number of end lines associated with each string of hooks, pots, or traps determine the quantity of gear in this collection. A single Federal permit holder may be responsible for marking several strings of a given gear type and may use multiple gear types that require marking.

II. Method of Collection

The regulations require Federal permit holders to affix the identifying information to the buoy or another part of the gear. No information is submitted to NMFS as a result of this collection.
