

incidental to specified activities within the specified geographical region. As previously stated, no mortality or serious injury of any marine mammal species is anticipated to occur or authorized. The incidental takes authorized herein are the same as those analyzed in the final rule (89 FR 45292, May 22, 2024). Takes of marine mammals will be minimized through the following planned mitigation and monitoring measures, as applicable for each specified activity: (1) implementation of spatio-temporal work restrictions; (2) use of multiple NMFS-approved Protected Species Observers (PSOs) to visually observe for marine mammals (with any detection within specifically designated zones triggering a delay or shutdown, as applicable); (3) use of NMFS-approved passive acoustic monitoring (PAM) operators to acoustically detect marine mammals during foundation pile driving, with a focus on detecting baleen whales (with any detection within designated zones triggering a delay or shutdown, as applicable); (4) implementation of clearance and shutdown zones; (5) use of soft-start prior to the start of foundation impact pile driving; (6) use of noise attenuation technology; (7) use of situational awareness monitoring for marine mammal presence; (8) conducting sound field verification during foundation installation and UXO/MEC detonation; (9) use of ramp-up acoustic sources during HRG surveys; and (10) implementation of several vessel strike avoidance measures (e.g., speed and separation distance measures) to reduce the risk of a vessel interaction with a marine mammal. Additionally, Sunrise Wind is required to submit reports frequently to NMFS.

Through adaptive management, NMFS may modify the LOA's mitigation, monitoring, or reporting measures, based on new information, when appropriate.

As described in the preamble of the final rule, NMFS has determined that the take authorized in the LOA is of small numbers of marine mammals, will have a negligible impact on marine mammal stocks, will not have an unmitigable adverse impact on the availability of the affected marine mammal stock for subsistence uses, and the mitigation measures provide a means of affecting the least practicable adverse impact on the affected stocks and their habitat.

Dated: June 24, 2024.

Kimberly Damon-Randall,

*Director, Office of Protected Resources,
National Marine Fisheries Service.*

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; West Coast Region Vessel Identification Requirements

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on April 2, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA), Commerce.

Title: West Coast Region Vessel Identification Requirements.

OMB Control Number: 0648-0355.

Form Number(s): None.

Type of Request: Regular submission (extension of a currently approved collection).

Number of Respondents: 1,007.

Average Hours per Response: 45 minutes.

Total Annual Burden Hours: 151 (annualized over five years).

Needs and Uses: This request is for extension of a currently approved information collection. The success of fisheries management programs depends significantly on regulatory compliance. The vessel identification requirement is essential to facilitate enforcement. The ability to link fishing (or other activity) to the vessel owner or operator is crucial to enforcement of regulations issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Act. A vessel's official number is required to be displayed on the port and starboard

sides of the deckhouse or hull, and on a weather deck. It identifies each vessel and should be visible at distances at sea and in the air. Law enforcement personnel rely on vessel marking information to assure compliance with fisheries management regulations. Vessels that qualify for particular fisheries are also readily identified, and this allows for more cost-effective enforcement. Cooperating fishermen also use the vessel numbers to report suspicious or non-compliant activities that they observe in unauthorized areas. The identifying number on fishing vessels is used by the National Marine Fisheries Service (NMFS), the United States Coast Guard (USCG), and other marine agencies in issuing regulations, prosecutions, and other enforcement actions necessary to support sustainable fisheries behaviors as intended in regulations. Regulation-compliant fishermen ultimately benefit from these requirements, as unauthorized and illegal fishing is deterred, and more burdensome regulations are avoided.

Affected Public: Business or other for-profit organizations.

Frequency: SFD staff consulted with various groundfish vessel captains participating in various groundfish pot, longline, midwater trawl, bottom trawl fisheries, and determined that gear and vessel markings have a five-year life span.

Respondent's Obligation: Mandatory.

Legal Authority: 50 CFR 660.12.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0648-0355.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.
