INSTRUCTIONS

SUPPORT TEST – How to determine if the support test is met. Determine whether you have provided more than half of a claimed individual's total support by comparing the amount you contributed to that individual's support with the entire amount of support that person received from all sources. This includes support the individual provided from the individual's own funds. **NOTE: A person's own income is not support unless the income is actually spent for support.**

Example: Your mother received \$2,400 in social security benefits and \$300 in interest. She paid \$2,000 for lodging and \$400 for recreation. She put \$300 in a savings account. Even though your mother received a total of \$2,700 (\$2,400 + \$300), she spent only \$2,400 (\$2,000 + \$400) for her own support. If you spent more than \$2,400 for her support and no other support was received, you have provided more than half of her support.
