Dear <school administrator>,

Thank you for participating in this study. This questionnaire asks for information about:

- School background information
- School management
- Teaching staff
- Assessment and evaluation
- Targeted groups
- School climate

This information will help illustrate the similarities and differences between groups of schools in order to better establish the context for students' test results. For example, the information provided may help to establish what effect the availability of resources may have on student achievement – both within and between countries.

The questionnaire should be completed by the principal or designate. It should take about 45 minutes to complete.

For some questions specific expertise may be needed. You may consult experts to help you answer these questions.

If you do not know an answer precisely, your best estimate will be adequate for the purpose of the study.

Please note that the forward button used to proceed to the next question is located at the bottom right hand corner of your screen. In some instances you may need to scroll down to the bottom of your screen to access this forward button.

Your answers will be kept confidential. They will be combined with answers from other principals to calculate totals and averages in which no school can be identified.

<School science> includes all <school sciences> courses referring to the domains of physics, chemistry, biology, <Earth science or geology>, <space science or astronomy>, applied sciences and technology either taught in your curriculum as separate science subjects or taught within a single ‘integrated-science’ subject. It does NOT include related subjects such as mathematics, psychology, economics, nor possible Earth science topics included in geography courses. The term <school science> has been used to explicitly distinguish from <broad science>. Please use a suitable generic term for a higher order concept summarizing these <school science> courses that most closely approximates this distinction.

<Foreign languages²> - Foreign languages are all modern languages formally taught in school settings, other than the main language of instruction. <English²> - The English language. <Language 1> | <Language 2> | <...etc. > - Concerning the language list: Given the very strong interest in this question for the Foreign Language Assessment, countries are recommended to ensure that the languages spoken at home are identified for as many students as possible. So, we recommend including all languages that are expected to be spoken by at least 1% of students. In addition, countries should ensure that all answer options (checkbox vertical list) from PISA2018 ST022 are retained to allow for trends. These languages should be included in addition to the other languages explicitly listed among the answer options of this question. <National modal grade for 15-year-olds> should be replaced with the actual name of the grade attended by most 15-year-olds in your country. Where it is possible that a sampled school does not offer tuition at this grade level, an explanatory note can be added: "If your school does not teach this grade then answer this question for an adjacent grade where most of your 15-year-old students are enrolled".

Question notes: The parent/guardian terminology is used in PISA to capture modern living arrangements that do not conform with the mother/father dualism (eg, having same-sex parents), but also that consider living in extended families (eg, with grandparents) where other people may have a role in taking care and raising the student (eg, siblings of adult age, grandparents) and, therefore, influence her or his learning environment.

This is a filtered question. Only if ST231 is “Two”, “Three” or “Four or more”.

This question is new for PISA 2025 FT. The item establishes the relationship between the guardian for which information on education and occupation is provided in following items and the student.

- If student selects Mother for parent 1 and Father for parent 2 in this question, it goes to ST236 – 2 Parents branch A (Mother/Father)
- If student selects Mother for parent 1 and Step-Mother for parent 2 in this question, it goes to ST236 – 2 Parents branch B (Mother/ Step-mother, foster mother, adoptive mother)
- If student selects Mother for parent 1 and Step-Mother for parent 2 in this question, it goes to ST236 – 2 Parents branch C (Mother/ Step-father, foster father, adoptive father) **see example below**
- If student selects Mother for parent 1 and Step-Mother for parent 2 in this question, it goes to ST236 – 2 Parents branch D (Mother/Grandmother)

The categories need to be specified using country-specific terms that will be understood by the students. Question notes: In response to stakeholder feedback, we have proposed the modification of the response options. We have added “I attended <ISCED 0> but do not remember when I started”, “I do not know if I attended <ISCED 0>”. We believe this will address the information required to disaggregate the information, but it does introduce a higher reading load.

The questionnaire framework includes this note:

Question for Core 1: In PISA 2018 there were issues in the design of the question of attendance of ISCED 0: response categories “I didn’t attend” and “I don’t remember” were conflated. This made it impossible to measure trends. Can we separate into 2 items: i) Did you attend ISCED 0 (yes/no), ii) For how long did you attend ISCED 0? (I don’t remember)? Or go back to previous way of asking?

Imagine a 10-point scale that represents how much effort you invest in something.

The highest value (10) marks a situation where you tried your very best and put as much effort as possible to do well.

The lowest value (1) marks a situation where you did not try hard at all and put the lowest possible effort to do well.

Now think about the effort you put into completing the PISA test and questionnaire.
