Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983, Aug. 29, 1995.

The summaries below describe the nature of the information collection requirements (ICRs) and the expected burden. The requirements are being submitted for clearance by OMB as required by the PRA.

Title: FTA Program Evaluation for Processes and Outcomes.

OMB Control Number: 2132-NEW INFORMATION COLLECTION REQUEST.

Background: The Foundations for Evidence-Based Policymaking Act of 2018 (the Evidence Act) requires Federal agencies to develop evidence to support policymaking. Federal agencies, including FTA, must systematically collect and analyze data to assess the effectiveness and efficiency of their programs through evaluation. According to the Evidence Act, "an evaluation is an assessment, using systematic data collection and analysis, of one or more programs, policies, and/or organizations intended to assess their effectiveness and efficiency." Evidence resulting from evaluations and other evidence-building activities should be used to inform leaders about whether Federal programs and activities are achieving their intended results and contribute to improved use of data and evidence-based decision making.

To effectively evaluate programs, FTA needs to collect data directly from program participants, such as State Departments of Transportation (DOTs), Metropolitan Planning Organizations (MPOs), Transit Authorities, State and Local Government Units, and Indian Tribes, to understand their experiences and benefits of program participation. Participants may be engaged through surveys or focus groups to collect

relevant data. The Office of Management and Budget (OMB) and the Government Accountability Office (GAO) strongly advocate for stakeholder engagement in evaluation design. OMB's M-19-23 Memorandum emphasizes that engaging stakeholders enhances the utility of evaluation findings to improve program effectiveness.

To ensure alignment with ongoing efforts, this information request seeks to support the FTA in meeting the Evidence Act's requirements and contribute to FTA's broader framework of evidence-based decision-making. This is a voluntary data and information collection, with no participation requirement to receive Federal benefits. The survey portion of this information collection differs from other similar efforts, such as the FTA Stakeholder Survey which targets grant recipients and inquires on customer satisfaction with a range of FTA services and knowledge of rulemaking. Current and previous information collections for grant applicants and grantees to provide routine program planning and metrics on plans and deliverables are separate from this collection. Rather, this information collection will allow FTA decision makers to understand challenges and barriers to program implementation, identify opportunities for improving program communications and outreach, and make stronger linkages between program progress and outcomes.

The summary provided below has been updated since the publication of the 60-Day **Federal Register** Notice. The estimated annual respondents and number of responses have changed to reflect the current number of program participants for each representative FTA program as of April 2024. The estimated total burden was also updated to reflect this change in the estimated number of respondents, as well as a change to the estimated time per information collection based on the results of pilot testing.

Respondents: State Departments of Transportation (DOTs) and Metropolitan Planning Organizations (MPOs), Transit Authorities, States, and Local Government Units, Indian Tribes.

Estimated Annual Respondents: 1,380 respondents.

Estimated Annual Number of

Responses: 2,070 responses.

Estimated Total Annual Burden: 2,180 hours.

Frequency: Annual.

Kusum Dhyani,

Director, Office of Management Planning.

SUPPLEMENTARY INFORMATION:

OMB Approval No. 2138-0013.

Title: Report of Financial and Operating Statistics for Large Certificated Air Carriers.

Form No.: BTS Form 41.

Type of Review: Extension of a currently approved collection.

Respondents: Large certificated air carriers.

Number of Respondents: 60.

Estimated Time per Response: 4 hours per schedule, an average carrier may submit 90 schedules in one year.

Total Annual Burden: 13,910 hours.

Needs and Uses: Program uses for Form 41 data are as follows:

Mail Rates

The Department of Transportation sets and updates the international and mainline Alaska mail rates based on carrier aircraft operating expense, traffic and operational data. Form 41 cost data, especially fuel costs, terminal expenses, and line haul expenses are used in arriving at rate levels. DOT revises the established rates based on the percentage of unit cost changes in the carriers' operations. These updating procedures have resulted in the carriers receiving rates of compensation that more closely parallel their costs of providing mail service and contribute to the carriers' economic well-being.
