

APPENDIX N. NASS comments and FNS responses

Jennifer Rhorer of the USDA National Agricultural Statistics Service, Methodology Division, reviewed the complete Information Collection Request (ICR) package for OMB and provided comments on eight documents (Appendices B, C22, F01.07, F01.12, F03.01, and Supporting Statements A and B). The comments were generally simple: making sure the respondent type was clear in B, confirming the time zone in C22, questions about the skip pattern in F01.07, F01.12, and F03.01, and small mistypes in Supporting Statements A and B. There were no questions or concerns regarding the research design or survey methodology of the project.

FNS reviewed and accepted all edits.
