B. COLLECTIONS OF INFORMATION EMPLOYING STATISTICAL METHODS

1. Universe and Respondent Selection

We conduct the November Voting and Registration Supplement in conjunction with the CPS, for which the universe is 133 million households. From this universe, we select a sample of approximately 70,000 households each month, of which approximately 59,000 households are eligible for interview.

We ask the items in the Voting and Registration supplement, as appropriate, for members of these households, resulting in 44,000 completed supplement interviews. Those eligible for the voting and registration questions include all civilian household members age 18 and up who are U.S. citizens. Based on previous response rates for similar questions, we expect the supplement response rate to be approximately 88 percent.

2. Procedures for Collecting Information

The Voting and Registration supplement is a supplemental survey associated with the CPS, conducted biennially in November. Attachment D gives an overview of the CPS sample design and weighting methodology and response rates. The statistical properties of these supplemental items will fall within those associated with the CPS itself.

3. Methods to Maximize Response

We maintain response rates and data accuracy for the CPS at high levels through interviewer instruction and training and close monitoring of data output. (Refer to Item 5 of Attachment D for a discussion of the CPS nonresponse.)

4. Testing of Procedures

We do not require testing of procedures and methods given that we have conducted the November Voting and Registration Supplement since 1964.

Attachment E discusses the reliability of estimates produced by the November 2022 supplement.

5. Contacts for Statistical Aspects and Data Collection

The following individuals may be contacted on the statistical data collection and analysis operations:

Statistical Design:

James Farber
Demographic Statistical Methods Division
U.S. Census Bureau
(301) 763- 1844

Data Collection/Survey Design:

Kyra M. Linse
Associate Directorate for
Demographic Programs -
Survey Operations
U.S. Census Bureau
