Subject: Prostate Cancer Screening Study – Thank You!

Dear [NAME],

Thank you for participating in the study to evaluate the effectiveness of an interactive decision aid for prostate cancer screening compared to an established decision aid and standard education materials. We hope through your participation you have learned about prostate cancer screening and feel confident speaking with your primary care provider about your options.

For this study there were three groups, the intervention group that was provided the interactive decision aid “Talk to Nathan About Prostate Cancer Screening”, and two control groups, one that received the established decision aid and a second that received standard education materials.

Below are the locations of each of these resources so you can review and discuss with your provider.

<b>Resource Name</b>	<b>Location</b>
Talk to Nathan: about prostate cancer screening (Interactive decision aid)	<a href="https://www.cdc.gov/cancer/prostate/talk-to-nathan/index.htm">https://www.cdc.gov/cancer/prostate/talk-to-nathan/index.htm</a>
Get the Latest Facts about Screening for Prostate Cancer (established decision aid)	Attached
National Cancer Institute’s Prostate Cancer Screening (PDQ®)–Patient Version (Standard education material)	Attached

If you have any questions about the study or how the results will be used, please reach out to Danielle Nielsen, ICF project manager at [Danielle.Nielsen@icf.com](mailto:Danielle.Nielsen@icf.com).

Thank you, again, for your participation!
