Project Information

Project Title

National Survey of Fishing, Hunting, and Wildlife-Associated Recreation

Last Updated

2024-06-12 15:21

Project Description

The National Survey of Fishing, Hunting, and Wildlife-Associated Recreation (Survey) has been conducted since 1955 and is one of the oldest and most comprehensive continuing recreation surveys. The Survey collects information on the number of anglers, hunters, and wildlife watchers, how often they participate, and how much they spend on their activities in the United States. The Survey reports results from interviews with U.S. residents about their fishing, hunting, and wildlife watching. While those who were interviewed revealed their affinities for the outdoors and how they spent their money on these pursuits, the Survey data demonstrate yet again that fishing, hunting, boating, and watching wildlife are part of the American lifestyle, and that these pursuits fuel economies and create enduring social and cultural bonds. The 2022 Survey focuses on participation and expenditures of persons 16 years of age and older. It also provides information on participation in wildlife-related recreation in 2021, including that of persons 6 to 15 years of age. These include estimates for motorized boating, archery, and target shooting with firearms.

Data Management Timeline

<u>Project Timeline</u> <u>Project Start Date</u> <u>Project End Date</u>

Planned Timeline 2025-01-01 2029-12-31

Data Review Schedule

Annual

Exisiting Data
1991, 1996, 2001, 2006, 2011, 2016, 2022 ASCII and SAS

Data Storage and Access

<u>Data Storage Location</u> <u>Project Reference Number</u>

Shared Drive, Local Storage Unknown

Data Storage Links

https://www.fws.gov/program/national-survey-fishing-hunting-and-wildlife-associated-recreation-fhwar

Data Access

Open

Data Access Justification

Public website for public access of public use data file

Required Resources

Required Resources

Adobe reader for reports and statistical software for data sets

Data and Metadata Standards

<u>Data Standard</u> <u>Metadata Standard</u>

Calendar Year, Geopolitical Entity Name and Code Not Applicable

Quality Assurance and Quality Control

Data Quality Assurance

Data collector and FWS coordination team have quality controls

Data Quality Control

Range edits and time of filling out questionnaires are the tools of data quality measures

Records Management

<u>Records Schedule</u> <u>Records Types</u>

Have digital records from 1991 to present. Will pdf reports and ASCII data sets

maintain records indefinitely

Records Disposition

maintain indefinitely for longitudinal trends analysis
