SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for the revision and extension of a current information collection, which includes both vessel and dealer permits.

Under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*), NMFS is responsible for management of the Nation's marine fisheries. In addition, NMFS must comply with the United States' obligations under the Atlantic Tunas Convention Act of 1975 (ATCA; 16 U.S.C. 971 *et seq.*).] Atlantic highly migratory species (HMS) fisheries are managed under the 2006 Consolidated HMS Fishery Management Plan (FMP) and its amendments pursuant to the Magnuson-Stevens Act and consistent with ATCA. HMS implementing regulations are at 50 CFR part 635. NMFS issues permits to fishing vessels and dealers in order to collect information necessary to comply with domestic and international obligations, secure compliance with regulations, and disseminate necessary information. Regulations at § 635.4 require that vessels participating in commercial and recreational fisheries for Atlantic HMS and dealers purchasing Atlantic HMS from a vessel obtain a federal permit issued by NMFS.

This action addresses the renewal of permit applications currently approved under OMB control number 0648–0327, including both vessel and Atlantic Tunas Dealer permits. Vessel permits include Atlantic Tunas (except Longline permits, which are approved under OMB control number 0648–0205), HMS Charter/Headboat, HMS Angling, and Swordfish General Commercial permits. This action also includes the one-time requirement for commercial vessels greater than 20 meters in length to obtain an International Maritime Organization/Lloyd's Registry (IMO/LR) number.

This action is also being revised to include a new requirement for all HMS vessel permit applications to be submitted online starting in 2025, and the one-time requirement for all permit applicants to set up an account on the HMS permits website. The latter was

implemented to make the program compatible with current federal data security requirements and will make it easier for permit holders with multiple vessel permits to manage their permits by linking them all within a single account. Finally, the action is revised to remove the ability to submit an application for an Atlantic Tunas Purse Seine category permit, as the Atlantic Tunas Purse Seine category was discontinued as part of Amendment 13 to the 2006 Consolidated HMS Fishery Management Plan after years of inactivity in the bluefin tuna fishery. More information on that action can be found in the Amendment 13 final rule (87 FR 59966, October 3, 2022).

The burden estimates in this renewal are also being updated to reflect increases in the total number of permits issued each year, and a \$1 increase in the price of HMS vessel permits to \$27 per permit, due to increased costs associated with maintaining and executing the program.

II. Method of Collection

Method of submittal will be electronic (online) only via the NMFS Permit Shop.
