Investigation Results

* Post transfusion purpura (PTP)

*Case Definition

Check all that occurred after cessation of transfusion :

- Alloantibodies in the patient directed against HPA or other platelet specific antigen detected at or after development of thrombocytopenia.
- Thrombocytopenia (i.e., decrease in platelets to less than 20% of pre-transfusion count).
- Decrease in platelets to levels between 20% and 80% of pre-transfusion count.

Check all that apply:

- PTP is suspected, but laboratory findings and/or information are not sufficient. NOTE: For example, the patient has a drop in platelet count to less than 80% of pre-transfusion count but HPA antibodies were not tested or were negative.

Other: (specify) _____

***Severity**

Did the patient receive or experience any of the following?

- No treatment required Symptomatic treatment only
 Hospitalization, including prolonged hospitalization Life-threatening reaction
 Disability and/or incapacitation Congenital anomaly or birth defect(s) of the fetus
 Other medically important conditions Death Unknown or not stated

***Imputability**

Which best describes the relationship between the transfusion and the reaction?

- Patient has no other conditions to explain thrombocytopenia.
 There are other potential causes present that could explain thrombocytopenia, but transfusion is the most likely cause.
 Alternate explanations for thrombocytopenia are more likely, but transfusion cannot be ruled out.
 Evidence is clearly in favor of a cause other than the transfusion, but transfusion cannot be excluded.
 There is conclusive evidence beyond reasonable doubt of a cause other than the transfusion.
 The relationship between the adverse reaction and the transfusion is unknown or not stated.

Did the transfusion occur at your facility? YES NO

When did the reaction occur in relation to the transfusion?

- Occurred 5-12 days post-transfusion
 Occurred less than 5 or more than 12 days post-transfusion

Module-generated Designations

NOTE: Designations for case definition, severity, and imputability will be automatically assigned in the NHSN application based on responses in the corresponding investigation results section above.
