
LEGAL STATUS

This site displays a prototype of a “Web 2.0” version of the daily Federal Register. It is not an official legal edition of the Federal Register, and does not replace the official print version or the official electronic version on GPO’s govinfo.gov.

The documents posted on this site are XML renditions of published Federal Register documents. Each document posted on the site includes a link to the corresponding official PDF file on govinfo.gov. This prototype edition of the daily Federal Register on FederalRegister.gov will remain an unofficial informational resource until the Administrative Committee of the Federal Register (ACFR) issues a regulation granting it official legal status. For complete information about, and access to, our official publications and services, go to [About the Federal Register](#) on NARA’s archives.gov.

The OFR/GPO partnership is committed to presenting accurate and reliable regulatory information on FederalRegister.gov with the objective of establishing the XML-based Federal Register as an ACFR-sanctioned publication in the future. While every effort has been made to ensure that the material on FederalRegister.gov is accurately displayed, consistent with the official SGML-based PDF version on govinfo.gov, those relying on it for legal research should verify their results against an official edition of the Federal Register. Until the ACFR grants it official status, the XML rendition of the daily Federal Register on FederalRegister.gov does not provide legal notice to the public or judicial notice to the courts.

DOCUMENT HEADINGS

Department of Health and Human Services
Centers for Disease Control and Prevention
[60Day-24-24EK; Docket No. CDC-2024-0026]

AGENCY:

Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION:

Notice with comment period.

SUMMARY:

The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled *B. multivorans* Ice Machine Multistate Investigation. This is an outbreak investigation which aims to evaluate the associations between *Burkholderia multivorans* infections among hospitalized patients and potential exposures to nonsterile ice and water from ice machines to help inform measures to prevent ongoing transmission.

DATES:

CDC must receive written comments on or before June 11, 2024.

ADDRESSES:

You may submit comments, identified by Docket No. CDC-2024-0026 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov (<http://www.regulations.gov>). Follow the instructions for submitting comments.*
- *Mail: Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30329.*

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to www.regulations.gov (<http://www.regulations.gov>).

Please note:

Submit all comments through the Federal eRulemaking portal (www.regulations.gov (<http://www.regulations.gov>)) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT:

To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30329; Telephone: 404-639-7570; Email: omb@cdc.gov (<mailto:omb@cdc.gov>).

SUPPLEMENTARY INFORMATION:

Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520 (<https://www.govinfo.gov/link/uscode/44/3501>)), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

B. multivorans Ice Machine Multistate Investigation—New—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC has been assisting state and local jurisdictions investigate clusters of *Burkholderia multivorans* infections among patients admitted across four hospitals in two non-contiguous states. The outbreak strain of the bacteria has been identified in environmental samples from ice machines. Molecular analysis has shown that the bacterial strain identified in ice machines is genetically highly similar to the patient isolates. Further investigation revealed that the same brand of ice machine and the same filters, descaling/cleaning, and sanitizing products were used by the four hospitals. Epidemiologic and laboratory evidence suggest the possibility of contaminated nonsterile ice and water from the same brand of ice machines as a common source of exposure.

Further investigation is needed to identify the scope of the outbreak and the source of the ice machine contamination. CDC has deemed it necessary to conduct a national call for cases requesting that public health authorities report cases and clusters of *B. multivorans*. A case report form (CRF) was developed by CDC to assist jurisdictions in this effort. Jurisdictions will gather information using this case report form to assist in determining epidemiologic characteristics and risk factors of patients with *B. multivorans* as well as potential source(s) of *B. multivorans*, including ice machines and ice machine-related products (e.g., cleaning solutions).

The Centers for Disease Control and Prevention will share findings and recommendations with public health and healthcare partners to prevent further spread of *B. multivorans* infections; findings may also be shared with other relevant stakeholders and/or published

in scientific journals to disseminate investigation outcomes. CDC requests OMB approval for an estimated 120 annual burden hours. There are no costs to respondents other than their time. ([print page 25876](#))

Estimated Annualized Burden Hours

Type of respondent	Form name	Number of respondents	Number responses per respondent	Avg. burden per response (in hrs.)	Total burden (in hrs.)
HAI/AR Program staff	<i>Burkholderia multivorans</i> outbreak investigation case report form	40	1	3	120
Total					120
