Graduate Medical Education (GME) Section 4122 FY 2026

Draft MEARIS™ Application screen shots

Note: The application questions in this appendix are based on CMS's proposed policy to implement the provisions of Section 4122 of the Consolidated Appropriations Act, 2023 as presented in the FY 2025 IPPS/LTCH PPS proposed rule. These collection questions are subject to change/revision when the final policies are adopted after consideration of public comments. The application questions for this collection will be updated, as necessary, as soon as possible after the rule is finalized.

Welcome page

Welcome to the Graduate Medical Education (GME) Section 4122 Application for Fiscal Year 2026

Important Information

The application period for GME full-time equivalent positions awarded in FY 2026 ends on March 31, 2025.

Positions awarded under section 4122 for FY 2026 will be effective July 1, 2026.

You will need information for the residency program for which your applying, including:

- Contact information
- . Hospital CMS Certification Number (CCN)
- . The Accreditation Council for Graduate Medical Education (ACGME) accreditation number
- . Worksheet E, Part A and Worksheet E-4 of the most recent as-filed cost report (CMS-2552-10)
- All fields are required unless marked as optional.
- The application saves automatically when you click 'Next' so you can continue where you left off. However, once submitted, the application cannot be changed.
- Eligibility criteria and other information on section 4122 of the Consolidated Appropriations Act may be found at: Direct Graduate Medical Education (DGME) Website
- PRA Disclosure Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is Pending (Expires: Pending). This is a voluntary information collection. The time required to complete this information collection is estimated to average (Pending) per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.

CMS Disclosure

Please do not send applications, claims, payments, medical records or any documents containing sensitive information to the PRA Reports Clearance Office. Please note that any correspondence not pertaining to the information collection burden approved under the associated OMB control number listed on this form will not be reviewed, forwarded, or retained. If you have questions or concerns regarding where to submit your documents, please contact the CMS point of contact for this module using the form available at the bottom of the MEARIS™ Section 4122 resources page.

DLC Info

General Info DLC Info Application Info Eligibility Supporting Documents Attestation Summary

Select a Demonstrated Likelihood Criterion (DLC) that best describes this application.

The applicant hospital must provide information to demonstrate the likelihood of filling requested slots under section 4122 within the first five training years beginning on or after July 1, 2026. Select the DLC you are using for your application. For section 4122 the training of residents in the new program or program expansion cannot have occurred prior to July 1, 2026. Please refer to the frequently asked questions document located on the DGME) webpage (7) for more information on filling out the DLC portions of the application.

Demonstrated Likelihood Criterion 1 (DLC 1)

Establishing a New Residency Program

The hospital does not have sufficient room under its FTE resident cap, is not a rural hospital eligible for an increase to its cap under 42 CFR 413.79(e)(3)(or any successor regulation), and intends to use the additional FTEs as part of a new residency program that it intends to establish on or after July 1, 2026.

Note: A "new" residency program that is currently part of a hospital's five-year cap-building period to establish or adjust its cap, cannot be used for a hospital's DLC 1 section 4122 application.

Demonstrated Likelihood Criterion 2 (DLC 2)

Expanding an Existing Residency Program

The hospital does not have sufficient room under its FTE resident cap, and the hospital intends to use the additional FTEs to expand an existing residency training program beginning on or after July 1, 2026.

None

Which HPSA is the hospital requesting that CMS use for prioritization of its application?

Note: The information on this screen and subsequent screens related to HPSAs is collected in the event that the HPSA prioritization criteria for 4122 are used as part the application process.

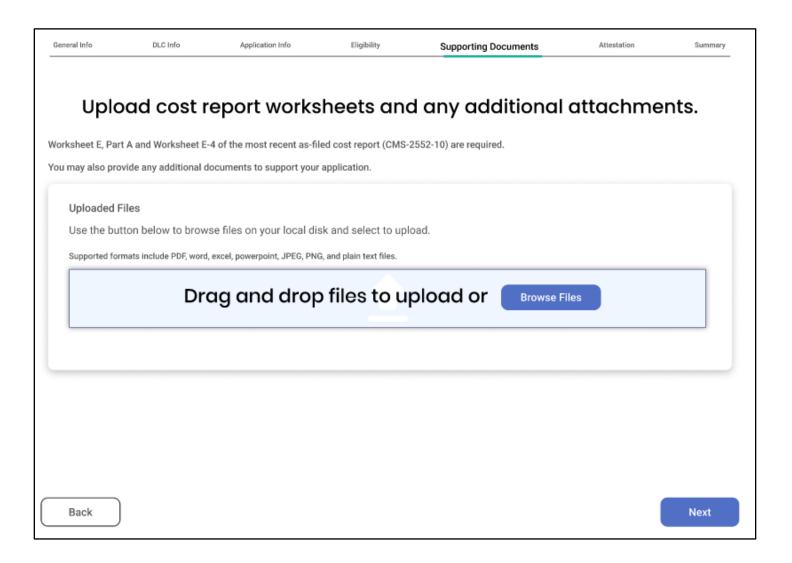

Hospitals should refer to HRSA's Find Shortage Area by Address Tool 2 to obtain the HPSA information to be used for its application. Using the HPSA Find Tool, applicants may enter the address of a scheduled training site, in the situation the hospital and location chosen participates in training residents in a program where at least 50 percent (5 percent if an Indian or Tribal Facility is included) of the training time occurs in the HPSA.
