

The Commissioner or designee shall have the authority to select members of other scientific and technical FDA advisory committees (normally not to exceed 10 members) to serve temporarily as voting members and to designate consultants to serve temporarily as voting members when: (1) expertise is required that is not available among current voting standing members of the Committee (when additional voting members are added to the Committee to provide needed expertise, a quorum will be based on the combined total of regular and added members) or (2) to comprise a quorum when, because of unforeseen circumstances, a quorum is or will be lacking. Because of the size of the Committee and the variety in the types of issues that it will consider, FDA may, in connection with a particular committee meeting, specify a quorum that is less than a majority of the current voting members. The Agency's regulations (21 CFR 14.22(d)) authorize a committee charter to specify quorum requirements.

If functioning as a medical device panel, an additional non-voting representative member of consumer interests and an additional non-voting representative member of industry interests will be included in addition to the voting members.

Further information regarding the most recent charter and other information can be found at <https://www.fda.gov/advisory-committees/human-drug-advisory-committees/Peripheral-and-Central-Nervous-System-Drugs-advisory-committee> or by contacting the Designated Federal Officer (see **FOR FURTHER INFORMATION CONTACT**). In light of the fact that no change has been made to the committee name or description of duties, no amendment will be made to 21 CFR 14.100.

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. 1001 *et seq.*) and 21 CFR part 14, relating to advisory committees. For general information related to FDA advisory committees, please visit us at <http://www.fda.gov/AdvisoryCommittees/default.htm>.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: National Survey of Health Information Exchange Organizations (HIO).

Type of Collection: New.

OMB No. 0955-0019.

Abstract: The Department of Health and Human Services, The Office of the Assistant Secretary for Technology Policy and Office of the National Coordinator for Health Information Technology, Electronic health information exchange (HIE) was one of three goals specified by Congress in the 2009 Health Information Technology for

Economic and Clinical Health (HITECH) Act to ensure that the \$30 billion federal investment in certified electronic health records (EHRs) resulted in higher-quality, lower-cost care. Subsequent legislation and regulations have continued to prioritize the sharing of data electronically across EHRs and other health information systems. Health information exchange organizations (HIOs) play a pivotal role facilitating health information exchange across disparate providers, labs, pharmacies, public health departments, and others. This information collection request will gather data from HIOs across the nation through the administration of a survey of HIOs to generate the most current national statistics and associated actionable insights to inform policy efforts. The timely collection of national data from our survey will assess current capabilities of HIOs to support effective electronic information sharing within the U.S. health care system.

Since prior to HITECH there has been ongoing assessment of trends in the capabilities of HIOs to support clinical exchange through nationwide surveys of HIOs. These prior surveys and studies have collected data on organizational structure, financial viability, geographic coverage, scope of services, scope of participants, perceptions of information blocking, support for public health exchange, and participation in national networks and the Technical Exchange Framework and Common Agreement (TEFCA). Continuing the ongoing data collection will be useful to construct a current and comprehensive picture of HIOs' role in facilitating exchange and ensuring rapid access to important health care data and information when it matters most, including vital data to address public health emergencies.

The survey will collect data on HIO capabilities to support electronic health information exchange, their maturity, and challenges they face. There are five key areas that require assessment: (1) adoption of technical standards; (2) perceptions related to information blocking; (3) HIE coordination at the federal level; (4) public health data exchange; and (5) organizational demographics, including technical capabilities offered by HIOs and the challenges they face in supporting electronic health information exchange.

This is a 3-year request for OMB approval.

Description of the need for the information and proposed use: The information collection is utilized during the processing of an application for FHA insured mortgage. The respondents are owners/sponsors, general contractors, lenders, and others involved in multifamily housing projects/rehabs. One of the options used in processing an application for FHA insured mortgage is Multifamily Application Processing (MAP). Third party contractors for mortgage insurance perform MAP. Mortgagors submit application for Multifamily Projects, to an approved lender for a project to be insured by HUD. The lender’s underwriters will complete all processing forms and submit them to HUD. The contractors involved are architects, cost analysts, appraisers, and mortgage credit analysts. An environmental review is also conducted, as well as a market analysis.
The information collection allows the multifamily staff to determine the appropriate mortgage insurance premium to apply in the underwriting of the loan for an FHA insured mortgage.
Respondents: FHA lenders, borrowers, participating in HUD Multifamily mortgage insurance programs as principals of sponsors, mortgagors, and general contractors.
Estimated Number of Respondents: 23,588.
