SUPPLEMENTARY INFORMATION:

Title: FERC-566: *Annual Report of a Utility's 20 Largest Purchasers*

OMB Control No.: 1902-0114.

Type of Request: Three-year extension of the FERC-566 information collection requirements with no revisions to the current requirements.

Abstract: Section 305(c) of the Federal Power Act (FPA),¹ mandates federal oversight and approval of certain electric corporate activities to ensure that neither public nor private interests are adversely affected. The FPA prescribes information filing

¹ 16 U.S.C 825d.

requirements to achieve this goal. These filing requirements are found at 18 CFR 46.3, and serve as the basis for FERC-566.

FERC-566 implements FPA requirements that each public utility annually publishes a list of the 20 purchasers which purchased the largest annual amounts of electric energy sold by such public utility during any of the three previous calendar years. The public disclosure of this information provides the information necessary to determine whether an interlocked position is with any of the 20 largest purchasers of electric energy.

Type of Respondents: Public utilities.

Estimate of Annual Burden: The Commission estimates 371 responses annually, and 4 hours and \$400 per response. The total estimated burdens per year are 1,484 hours and \$148,400. These burdens are itemized in the following table:

A. Number of Respondents	B. Annual Number of Responses per Respondent	C. Total Number of Responses (Column A x Column B)	D. Average Burden & Cost Per Response²	E. Total Annual Burden Hours & Total Annual Cost (Column C x Column D)	F. Cost per Respondent (\$) (Column E ÷ Column A)
371	1	371	4 hrs.; \$400	1,484 hrs.; \$ 148,400	\$400

² Commission staff estimates that the average industry hourly cost for this information collection is approximated by the current FERC 2024 average hourly costs for wages and benefits, i.e., \$100.00/hour.

Comments: Please submit comments on (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Debbie-Anne A. Reese,
Acting Secretary.
