**12. Respondent Burden and its Labor Costs**

- a. Number of Respondents: 100
- b. Frequency of Response: On occasion
- c. Annual Burden Hours: 8 hours
- d. Estimated Completion Time: 5 minutes
- e. VA cannot make further assumptions about the population of respondents because of the variability of factors such as the educational background and wage potential of respondents. Therefore, VBA used general wage data to estimate the respondents' costs associated with completing the information collection.

The Bureau of Labor Statistics (B:S) gathers information on full-time wage and salary workers. According to the latest available BLS data, the mean weekly earnings of full-time wage and salary workers are \$1,259.20. Assuming a forty (40) hour work week, the mean hourly wage is \$31.48 based on the BLS wage code – “00-0000 All Occupations.” This information was taken from the following website: [https://www.bls.gov/oes/current/oes\\_nat.htm](https://www.bls.gov/oes/current/oes_nat.htm), May 2023).

Legally, respondents may not pay a person or business for assistance in completing the information collection. Therefore, there are no expected overhead costs for completing the information collection. VBA estimates the total cost to all respondents to be **\$252** (8 burden hours x \$31.48 per hour).

**13. Respondent Costs Other Than Burden Hour Costs**

This submission does not involve any record keeping costs.
