Good Afternoon,

I fully support ASNNA's input and was involved in helping to inform it. I work primarily with tribal nations in Oklahoma as well as the general population and feel more "real world" experience/actual programming experience is needed when formulating required documents.

The time involved has grown and as of yet - I have not seen benefit nor enhanced programming with those we serve due to these document requirement changes. I know all changes take time but I do agree with ASNNA's input and I hope it is used to make reporting more meaningful to inform our programming in each state and territory.
