Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Permits for Incidental Taking of Endangered or Threatened Species

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for

review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on June 6, 2024, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration, Commerce.

Title: Permits for Incidental Taking of Endangered or Threatened Species.

OMB Control Number: 0648-0230.

Form Number(s): None.

Type of Request: Regular submission [extension of a current information collection].

Number of Respondents: 35.

Average Hours per Response: 80 hours for a permit application (including Habitat Conservation Plans), 1 hour for transfer of an incidental take permit, 8 hours for a permit report, 30 minutes for a Certificate of Inclusion (when applicable), and 10 hours for a watershed plan (when applicable).

Total Annual Burden Hours: 427.

Needs and Uses: This request is for an extension of a currently approved information collection.

The Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*) imposed prohibitions against the taking of endangered species. In 1982, Congress revised the ESA to allow permits authorizing the taking of endangered species incidental to otherwise lawful activities. The corresponding regulations (50 CFR part 222.222) established procedures for persons to apply for such a permit. In addition, the regulations set forth specific reporting requirements for such permit holders.

The regulations contain three sets of information collections: (1) applications for incidental take permits, (2) applications for certificates of inclusion, and (3) reporting requirements for permits issued. Certificates of inclusion are only required if a general permit is issued to a representative of a group of potential permit applicants, rather than requiring each entity to apply for and receive a permit.

The required information is used to evaluate the impacts of the proposed activity on endangered species, to make the determinations required by the ESA prior to issuing a permit, and to establish appropriate permit conditions.

Affected Public: Individuals or households; Business or other for-profit organizations.

Frequency: 1 application per a permit, annual permit reporting, and 24-hour Interaction Reports.

Respondent's Obligation: Required to Obtain or Retain Benefits.

Legal Authority: ESA; 16 U.S.C. 1531 *et seq.*

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0230.

Endangered and Threatened Species; Notice of Initiation of a 5-Year Review for the Chinese River Dolphin

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of initiation; request for information.

SUMMARY: The National Marine Fisheries Service (NMFS) announces the initiation of a 5-year review for the Chinese river dolphin, also called the Baiji or the Yangtze River dolphin, (*Lipotes vexillifer*). NMFS is required by the Endangered Species Act (ESA) to conduct 5-year reviews to ensure that the listing classifications of species are accurate. The 5-year review must be based on the best scientific and commercial data available at the time of the review. We request submission of any such information on the Indus River dolphin, particularly information on the status, threats, and recovery of the species that has become available since the previous review in 2017.

DATES: To allow us adequate time to conduct this review, we must receive your information no later than December 2, 2024.

ADDRESSES: You may submit information on this document, identified by NOAA–NMFS–2024–0111, by the following method:

- **Electronic Submission:** Submit electronic information via the Federal e-Rulemaking Portal. Go to <https://www.regulations.gov> and enter NOAA–NMFS–2024–0111 in the Search box. Click on the "Comment" icon, complete the required fields, and enter or attach your comments.

Instructions: Information sent by any other method, to any other address or individual, or received after the end of the specified period, may not be considered by NMFS. All information received is a part of the public record

and will generally be posted for public viewing on <https://www.regulations.gov> without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive or protected information submitted voluntarily by the sender will be publicly accessible. FOR FURTHER INFORMATION CONTACT:

Chris Parsons, NOAA Affiliate, Chris.Parsons@noaa.gov, tel. (301) 427–8400 (main office).

SUPPLEMENTARY INFORMATION:

This notice announces the initiation of our review of the Chinese River dolphin (*Lipotes vexillifer*), listed as endangered under the ESA. Section 4(c)(2)(A) of the ESA requires that we conduct a review of listed species at least once every 5 years. The species was previously reviewed in 2017. The regulations in 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing species currently under active review. On the basis of such reviews under section 4(c)(2)(B), we determine whether any species should be removed from the list (i.e., delisted) or reclassified from endangered to threatened or from threatened to endangered (16 U.S.C. 1533(c)(2)(B)). As described by the regulations in § 424.11(e), the Secretary of Commerce shall delist a species if the Secretary determines, based on consideration of the factors and standards set forth in paragraph (c) of that section, that the best scientific and commercial data available substantiate that: (1) the species is extinct; (2) the species has recovered to the point at which it no longer meets the definition of an endangered species or a threatened species; (3) new information that has become available since the original listing decisions shows the listed entity does not meet the definition of an endangered species or a threatened species; or (4) new information that has become available since the original listing decision shows the listed entity does not meet the definition of a species. Any change in Federal classification would require a separate rulemaking process.

Background information on the species is available on the NMFS website at: <https://www.fisheries.noaa.gov/species/chinese-river-dolphin>.
