

# Hospital Inpatient Quality Reporting Program Denominator Declaration

**Please Note:** A data collection tool available within the Hospital Quality Reporting system via the Hospital Quality Reporting Secure Portal allows hospitals to complete and submit their denominator declaration data. This document is a representation of the text contained in the denominator declaration data form and is for reference purposes only.

## Denominator Declaration

Discharge Quarter

For each measure, determine how many cases from the discharge quarter meet the Initial Patient Population (IPP) requirements. If you have:

- **Five or fewer cases:** Select the appropriate number (0-5).
- **More than five cases:** Leave the dropdown blank. Submit your measure data under eQCM submissions.

Some measures have different requirements for denominator populations. If none of your cases meet those requirements, select **Zero denominator declaration**.

The HQR System will display results of the most recent successful submission. Resubmitting this form or submitting via eQCM will overwrite previous submissions.
