Internal Revenue Service (IRS)  
U.S. Tax-Exempt Income Tax Returns  
OMB Control Number 1545-0047

1. CIRCUMSTANCES NECESSITATING COLLECTION OF INFORMATION

Internal Revenue Code (IRC) section 6033 generally requires organizations exempt from federal income tax under IRC section 501(a) to file an annual return. Revenue Procedure 95-48, IRC section 6033 and its associated Treasury Regulations provide exceptions to the annual return filing.

These forms are used by tax-exempt organizations to specify their items of gross income, receipts and disbursements, and other information for the purpose of carrying out the internal revenue laws. In general, all information an organization reports on or with its return will be available to the public for inspection as required by IRC section 6104. The data received is used to prevent organizations from abusing their tax-exempt status and to provide the public with financial information about nonprofit organizations.

OMB clearance for the burden estimate will be requested before the relevant tax filing season but after the IRS has had the opportunity to update its models with prior year data and to make necessary revisions to draft forms (including providing drafts to public for comment) and is sought on an annual basis instead of on the regular 3-year Paperwork Reduction Act (PRA) cycle. Doing so ensures that new and updated forms can be made available for use on a timelier basis.

This information collection request (ICR) covers the actual reporting, recordkeeping, and third-party disclosure burden associated with the forms and their affiliated schedules and regulations, listed below. Forms that are used by other tax filers (e.g., individuals, businesses, trusts and estates) are marked with an asterisk (\*). These forms will continue to report burden for other taxpayers under separate OMB numbers.

## 2. USE OF DATA

These forms are used by tax-exempt entities to report their income tax liability. The data on these forms and their schedules will be used in determining that the items claimed are properly allowable and for general statistical use.

3. USE OF IMPROVED INFORMATION TECHNOLOGY TO REDUCE BURDEN

Electronic filing is currently available for forms and schedules used by tax-exempt entities.

4. EFFORTS TO IDENTIFY DUPLICATION

The information obtained through this collection is unique and is not already available for use or adaptation from another source.

5. METHODS TO MINIMIZE BURDEN ON SMALL BUSINESSES OR OTHER SMALL ENTITIES

The collection of information requirement will not have a significant economic impact on a substantial number of small entities. Small tax-exempt entities with annual gross receipts of \$50,000 or less may file the Form 990-N (“e-Postcard”), which requires minimal reporting of information. Medium-sized tax-exempt entities with gross receipts less than \$200,000 and total assets less than \$500,000 may file the simplified Form 990-EZ.

6. CONSEQUENCES OF LESS FREQUENT COLLECTION ON FEDERAL PROGRAMS OR POLICY ACTIVITIES

Consequences of less frequent information collection on federal programs or policy activities could consist of the inability to fulfill tax administration responsibilities by the IRS, inaccurate and untimely filing of tax returns, and an increase in tax violations.

7. SPECIAL CIRCUMSTANCES REQUIRING DATA COLLECTION TO BE INCONSISTENT WITH GUIDELINES IN 5 CFR 1320.5(d)(2)

There are no special circumstances requiring data collection to be inconsistent with guidelines in 5 CFR 1320.5(d)(2).

8. CONSULTATION WITH INDIVIDUALS OUTSIDE OF THE AGENCY ON AVAILABILITY OF DATA, FREQUENCY OF COLLECTION, CLARITY OF INSTRUCTIONS AND FORMS, AND DATA ELEMENTS

In response to the Federal Register notice dated September 11, 2024 (89 FR 73746), IRS received public comments from several parties. The full comments will be included within submission to the Office of Management and Budget (OMB). The summary of the comments and the IRS responses are below:

Tax compliance burden is defined as the time and money taxpayers spend to comply with their tax filing responsibilities. See 86 Fed. Reg. 54508 (Oct. 1, 2021). distinguish between an organization's receipt of "gifts, grants, and contributions" on one hand (reported on Part VIII, line 1 of Form 990) and "gross receipts from ... performance of services" (program services revenue) (reported on Part VIII, line 2 of Form 990) and also "support ... from a governmental unit." See IRC 509(a)(2), 170(b)(1)(A)(vi). Treasury regulations provide guidance regarding how to distinguish grants from gross receipts and how to identify revenue that constitutes "support from a governmental unit" and provide examples. See Treas. Reg. 1.509(a)-3(f), (g); 1.170A-9(f)(8). Published legal guidance further confirms that Medicaid and Medicare payments are treated as gross receipts for the performance of services and reported on line 2. See Rev. Proc. 83-153, 1983-2 C.B. 48. The form and instructions provide for accurate reporting consistent with these tax law authorities, including explicit reference in the instruction to reporting Medicaid and Medicare payments as program services revenue on line 2 of Part VIII of Form 990. The tax law and tax administration needs therefore do not support imposing the burden that would result from requiring more specific or different reporting of these government revenues beyond the categories currently in place on the Form 990. In addition, hospitals required to file Schedule H (Form 990), Hospitals, report revenues from Medicaid (Part I, line 7b) and Medicare (Part III, Section B).

The instructions do not provide interpretive examples that go beyond published legal guidance. Furthermore, applicable regulations confirm that the label on an agreement is not determinative whether a government payment is a contribution (grant) or a gross receipt from the performance of services related to an exempt purpose (program services revenues). See Treas. Reg. 1.509(a)-3(g)(1) ("The fact that the agreement, pursuant to which

The statute provides that, for any applicable entity making an elective pay election, any applicable credit is determined:</p> <ol style="list-style-type: none"> <li>1. without regard to the restrictions regarding use of property by tax-exempt organizations and government entities including Indian tribal governments found in sections 50(b)(3) and (4)(A)(i), and</li> <li>2. by treating any property with respect to</li> </ol>

1120-SF, 1120-FSC, 1120-L, 1120-PC, 1120-PC, 1120-REIT, 1120-RIC, 1120-POL, and related attachments)

which such credit is determined as used in a trade or business of the applicable entity.

Form 990T is filed by tax-exempt organizations to report any unrelated business income (UBI) and to claim certain tax credits and make an elective pay election. Any applicable entity filing a Form 990T to claim an elective pay election (regardless of any UBI reported on the return) is required to attach a Form 3800. The instructions to the Form 3800 provide that:

**Credit ordering for taxpayers making elective payment election.** If you made an elective payment election for certain current credits reported on Part III, credit amounts allowed as a net elective payment election amount in column (i) of Part III are treated as payments and are not considered for carryback and carryforward rules.

This also applies to applicable entities. Any applicable entity with UBI tax under section 512 uses an applicable credit with respect to a facility or property only if it is not part of the net elective payment amount in column (i) of Part III and regardless of whether or not such facility or property was used in connection with the unrelated business.

The 3800 instructions provide further examples on how to calculate the net elective payment election amounts.

In general, the filing organization is responsible for determining what is unrelated to its exempt purpose. Therefore, the IRS does not require a clarifying statement on the 990T with respect to the whether or not an elective pay election constitutes UBI.

Title 26 U.S.C. 6109 requires inclusion of identifying numbers in returns, statements, or other documents for securing proper identification of persons required to make such returns, statements, or documents and is the authority for social security numbers (SSNs) in IRS systems.

12. ESTIMATED BURDEN OF INFORMATION COLLECTION &
13. ESTIMATED TOTAL ANNUAL COST BURDEN TO RESPONDENTS

### **PRA Approval of Forms Used by Tax-Exempt Taxpayers**

Under the PRA, OMB assigns a control number to each "collection of information" that it reviews and approves for use by an agency. The PRA also requires agencies to estimate the burden for each collection of information. Burden estimates for each control number are displayed in (1) PRA supporting statement that accompanies collections of information, (2) Federal Register notices, and (3) OMB's database of approved information collections.

Forms 990, 990-EZ, 990-PF, 990-N, 990-T, and all attachments to these forms (see the Appendix-A to this supporting statement) are used by tax-exempt organizations to report their information and tax return filing obligations.

### **Taxpayer Compliance Burden Model**

Taxpayer compliance burden is defined as the time and money taxpayers spend to comply with their information and tax reporting responsibilities. Time-related activities include recordkeeping, tax planning, gathering tax materials, learning about the law and what the taxpayer needs to do, and completing and submitting the return. Out-of-pocket costs include expenses such as purchasing tax software, paying a third-party preparer, and printing and postage. Taxpayer compliance burden does not include a taxpayer's tax liability, economic inefficiencies caused by sub-optimal choices related to tax deductions or credits, or psychological costs.

The IRS uses the Taxpayer Compliance Burden Model for Tax-Exempt Organization Reporting Burden to estimate the burden experienced by tax-exempt organizations when complying with Federal tax laws. The model is based on a survey of Tax Year 2017 and 2018 tax-exempt organization information and tax return filers that was fielded in 2019 and 2020. The model is updated annually to account for legislative and regulatory changes. This methodology for estimating burden focuses on the characteristics and activities undertaken by tax-exempt organizations in meeting their information and tax return filing obligations.

The methodology is based on the primary drivers associated with observed tax-exempt organization information and tax return reporting burden. These include total revenue, assets, expenses, and liabilities, type of Form 990, type of organization, and the complexity of the tax-exempt organization's income generated from assets and investments. Indicators of tax law and administrative complexity, as reflected in the tax laws and instructions, are incorporated into the model.

### **Taxpayer Burden Estimates**

Summary results for Fiscal Year 2025 using the Taxpayer Compliance Burden Model burden estimation methodology for tax-exempt organizations are presented below. The data shown are the best forward-looking estimates available for tax-exempt organization information and tax returns filed for Tax Year 2024. The burden estimates are based on statutory requirements as of December 1, 2024.

*Total monetized burden = Burden in Monetized Hours + Out-of-Pocket Costs. Detail may not add to total due to rounding.					
<b>Note:</b> Reported time and cost burdens are national averages and do not necessarily reflect a “typical” case. Most taxpayers experience lower than average burden, with taxpayer burden varying considerably by taxpayer type. Detail may not add to total due to rounding.					

Tax return data are used to calculate a monetization rate for each tax-exempt organization return. A lower bound is set at the federal median wage rate from the Bureau of Labor Statistics (BLS) Occupational Employment Statistics (OES) Survey. Rates from the OES and the BLS Employer Costs for Employee Compensation from the National Compensation Survey are used for the upper bound. Specifically, we use the 90<sup>th</sup> percentile for accountants and auditors from the OES and the ratio of total compensation to wages and salaries from the private industry workers (management, professional, and related occupations) to account for fringe benefits. The change in estimated aggregate compliance burden is due to technical adjustments as described in supporting statement question 15.

The following additional breakouts of average burden are provided for transparency in understanding the average estimated burden experienced by taxpayers. Table 1 shows the average burden by the type of Form 990. Table 2 shows the average burden for Forms 990, 990-EZ and PF by total positive income. Total positive income is defined as the sum of all positive income amounts reported on the return.

#### 14. ESTIMATED ANNUALIZED COST TO THE FEDERAL GOVERNMENT

The federal government cost estimate for product development is based on a model that considers the following three cost factors for each information product: aggregate labor costs for development, including annualized startup expenses, operating and maintenance expenses, and distribution of the product that collects the information. These costs do not include any activities such as taxpayer assistance and enforcement.

The government computes cost using a multi-step process. First, the government creates a weighted

factor for the level of effort to create each information collection product based on variables, such as complexity, number of pages, type of product, and frequency of revision. Second, the total costs associated with developing the product such as labor cost, and operating expenses associated with the downstream impact such as support functions, are added together to obtain the aggregated total cost. Then, the aggregated total cost and factor are multiplied together to obtain the aggregated cost per product. Lastly, the aggregated cost per product is added to the cost of shipping and printing each product to IRS offices, National Distribution Center, libraries, and other outlets. The result is the government cost estimate per product.

Product	Aggregate Cost per Product (factor applied)		Printing and Distribution		Government Cost Estimate per Product
Tax-Exempt Forms and Instructions	\$7,279,110		\$11,371		\$7,290,481
<b>Totals</b>	<b>\$7,279,110</b>		<b>\$11,371</b>		<b>\$7,290,481</b>
Table costs are based on 2023 actuals obtained from IRS Chief Financial Officer and Media and Publications					
* New product costs will be included in the next collection update.					

See the attached Government Cost document in the supplementary documents section for more information.

The government cost estimates for processing tax returns and performing related functions in the Submission Processing Campus(es) includes salaries and benefits only. Other costs such as real estate, programming, recruitment, equipment and supplies are not included.

Estimated Filers	Processing Cost - Paper Returns		Processing Cost - Electronic Returns		Government Cost Estimate
1,711,300	\$172,157	+	\$301,873	=	\$474,030
<b>Total</b>					<b>\$474,030</b>
Table costs estimates are based on FY2023 IRS Cost Estimate References.					

The total government cost estimate for this collection is \$7,764,511.

## 15. REASONS FOR CHANGE IN BURDEN

The year-over-year change in burden is analyzed and reported by technical adjustments, legislative adjustments, and agency adjustments.

**Changes Due to Technical Adjustment:** There are significant adjustments in the year-over-year technical changes. The impact on burden related to these changes is shown in the table below. Altogether, technical adjustments lead to a decrease in burden. Increases from macroeconomic adjustments and population growth between Fiscal Year 2024 and Fiscal Year 2025 were offset by an overestimate of the number of Fiscal Year 2024 filers last year and decreases from incorporating updated population filer data. Overall, technical adjustments lead to a 3% decrease in aggregate time and a 1% decrease in aggregate out-of-pocket costs.

<b>Technical Adjustments</b>	<b>Number of Taxpayers</b>	<b>Burden in Hours</b>	<b>Burden in Monetized Time</b>	<b>Burden in Dollars</b>	<b>Monetized Total Burden*</b>
Updated Fiscal Year 2024 Population Counts	(21,300)	(2,550,000)	(83,300,000)	(54,600,000)	(137,900,000)
Updated Fiscal Year 2024 Macro Adjustments	-	-	15,700,000	7,900,000	23,600,000
Updated Data	-	15,000	(95,300,000)	(45,700,000)	(141,000,000)
Updated Fiscal Year 2025 Population Counts	34,100	485,000	44,500,000	26,500,000	71,000,000
Updated Fiscal Year 2025 Macro Estimates	-	-	101,900,000	50,800,000	152,700,000
<b>Total Technical Adjustments</b>	<b>12,800</b>	<b>(2,050,000)</b>	<b>(16,500,000)</b>	<b>(15,100,000)</b>	<b>(31,600,000)</b>
Source: IRS:RAAS:KDA:BRDN (12-10-2024)					
Macro Adjustments = Adjustments for macroeconomic factors like inflation					
* Monetized Total Burden = Burden in Monetized Time + Burden in Dollars. Detail may not add due to rounding.					

**Changes Due to Legislative Adjustment:** The Inflation Reduction Act of 2022 (IRA), P.L. 117-169, introduced changes that result in legislative burden. IRA introduced and expanded a number of clean energy provisions. Year-over-year changes associated with the Inflation Reduction Act (IRA) are allocated to legislative adjustments. Note that the year-over-year legislative adjustment is the difference between updated Fiscal Year 2024 legislative estimates and Fiscal Year 2025 legislative estimates. The year-over-year change between Fiscal Year 2024 and Fiscal Year 2025 estimates attributed to IRA do not lead to changes in estimated burden. There is still significant uncertainty about program participation. Tax Year 2023 tax returns have only recently become available, and Form 990-T extension filings are not yet available. More granular estimates will be provided once IRA provision participation from Tax Year 2023 has been verified.

**Changes Due to Agency Adjustment:** There were no independent and significant year-over-year Agency changes impacting the burden calculations for this collection.

16. PLANS FOR TABULATION, STATISTICAL ANALYSIS AND PUBLICATION

The data on these forms and their schedules will be used in computing the tax liability and also for general statistical use.

17. REASONS WHY DISPLAYING THE OMB EXPIRATION DATE IS INAPPROPRIATE

The IRS believes that displaying the OMB expiration date is inappropriate, because it could cause confusion by leading taxpayers to believe that the forms and regulations expire as of the expiration date. Taxpayers are not likely to be aware that the IRS intends to request renewal of the OMB approval and obtain a new expiration date before the old one expires.

18. EXCEPTION TO THE CERTIFICATION STATEMENT

There are no exceptions to the certification statement for this collection.
