## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-6462-N-01]

### Section 8 Housing Assistance Payments Program—Fiscal Year (FY) 2024 Inflation Factors for Public Housing Agency (PHA) Renewal Funding

**AGENCY:** Office of the Assistant Secretary for Policy Development and Research, HUD.

**ACTION:** Notice.

**SUMMARY:** This notice establishes Renewal Funding Inflation Factors (RFIFs) to adjust Fiscal Year (FY) 2024 renewal funding for the Housing Choice Voucher (HCV) Program of each public housing agency (PHA), as required by the Consolidated Appropriations Act, 2024. The notice apportions the expected percent change in national Per Unit Cost (PUC) for the HCV program, 7.38 percent, to each PHA based on the change in Fair Market Rents (FMRs) for their operating area to produce the FY 2024 RFIFs. HUD’s FY 2024 methodology differs in part from that used in FY 2023. HUD has refined the national PUC forecast by changing the gross rent component in a manner that weights projected recent mover rents as measured by the FMR with an independent forecast of all-mover rents as measured by the Consumer Price Index (CPI).

**DATES:** *Applicability Date:* May 10, 2024.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

Division F, Title II of the Consolidated Appropriations Act, 2024 requires that the HUD Secretary, for the calendar year 2024 funding cycle, provide renewal funding for each public housing agency (PHA) based on validated voucher management system (VMS) leasing and cost data for the prior calendar year and by applying an inflation factor as established by the Secretary, by notice published in the **Federal Register**. This notice announces the availability of the FY 2024 inflation factors and describes the methodology for calculating them. Tables in PDF and Microsoft Excel formats showing Renewal Funding Inflation Factors (RFIFs) by HUD Fair Market Rent Area are available electronically from the HUD data information page at: <https://www.huduser.gov/portal/datasets/rfif/rfif.html>.

##### II. Methodology

RFIFs are used to adjust the allocation of Housing Choice Voucher (HCV) program funds to PHAs for local changes in rents, utility costs, and tenant incomes. To calculate the RFIFs, HUD first forecasts a national inflation factor, which is the annual change in the national average Per Unit Cost (PUC). HUD then calculates individual area inflation factors, which are based on the annual changes in the two-bedroom Fair Market Rent (FMR) for each area. Finally, HUD adjusts the individual area inflation factors to be consistent with the national inflation factor.

Since FY 2017, HUD’s method of projecting the national average PUC has been based on independent forecasts of gross rent and tenant income. Each forecast is produced using historical and forecasted macroeconomic data as independent variables, where the forecasts are consistent with the Economic Assumptions of the Administration’s FY Budget. The forecast for gross rent is itself based on forecasts of the Consumer Price Index (CPI) Rent of Primary Residence Index and the CPI Fuels and Utilities Index. Forecasted values of gross rent series were then applied to the relevant FY national average two-bedroom FMR to produce a CY value. Finally, a “notional” PUC is then calculated as the difference between gross rent value and 30 percent of tenant income (the standard for tenant rent contribution in the voucher program). HUD uses a notional PUC as opposed to the actual
