

Methane Challenge ONE Future Reporting Form

This reporting form must be downloaded from the Methane Challenge module in e-GGRT. All data on this page will automatically populate based on data entered in e-GGRT. **Note that you will need to submit a separate report for each of your facilities.**

If data on this tab are incorrect, you can fix the data in e-GGRT and redownload this form. If you need help locating the data in e-GGRT, please contact the Help Desk (GHGreporting@epa.gov)

After completing this Facility Info tab, please use the Table of Contents (TOC) tab to navigate to and fill out the appropriate tabs corresponding to the sources for which this facility is reporting. Based on the segment you select, cells collecting data not applicable to your segment will automatically turn black and serve as an indicator that you do not need to fill them out.

Last Updated: 3/31/2021
Version: ICR RENEWAL 2021

Report Year

Partner Name

Facility Name

Methane Challenge Partner ID Number Assigned Methane Challenge Partner ID Number is unique to each partner. Each reporting facility under the Partner should use the same Methane Challenge Partner ID Number.

Methane Challenge Facility ID Number Assigned Methane Challenge Facility ID Number is unique to each facility. Each reporting facility for a Partner should have a unique Methane Challenge Facility ID Number.

GHGRP Facility ID Number A 6-digit number in this cell indicates that this facility reported through the Greenhouse Gas Reporting Program (GHGRP). On all subsequent tabs, fields shaded in grey represent information that should have already been reported for this facility via the GHGRP. Therefore, when completing this form you should skip fields that are shaded in grey. Please note that this form will not update Subpart W data in e-GGRT.

- Industry Segment
- Production
 - Gathering & Boosting
 - Processing
 - Transmission Compression
 - Storage
 - LNG Storage
 - LNG Import/Export
 - Transmission Pipeline
 - Distribution

This is a preview version of the reporting form only. **The Methane Challenge Reporting System will not accept reports submitted on this version of the reporting form.** Partners should always download their facility-specific reporting forms directly from the Reporting System.

Pre-populated using certified Part 98 Subpart W annual report:

Reporting Year:
Version:
Date Certified:

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2060-0722). Responses to this collection of information are voluntary 42 USC 7403(g). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 60 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address

Table of Contents

This hyperlinked ToC is provided to make it easier to navigate the reporting form. The . If a source is applicable, but its tab not yet complete, 'No' will appear in the correspond Column C. To indicate a source is complete, mark the 'Source Form Complete' button source is applicable for the facility's segment, but the facility does not actually contain i automatically.

Station Venting Applicable Segments: Storage, LNG Storage

Table 1. Station Venting (GHGI)

Routine Maintenance/Upsets: Storage Station - Venting	
Actual count of storage stations (natural gas)	
Annual CH ₄ emissions (mt CH ₄)	
LNG Storage: LNG Stations	
Actual count of LNG storage stations (natural gas)	
Annual CH ₄ emissions (mt CH ₄)	

Please fill out either the GHGI method table OR the alternate calculation table.

Table 2. Station Venting (alternate calculation method)

	Actual count of blowdowns by equipment or event type	Annual CH ₄ emissions by equipment or event type (mt CH ₄)
Facility piping		
Pipeline venting		
Compressors		
Scrubbers/strainers		
Pig launchers and receivers		
Emergency shutdowns		
All other equipment with a physical volume greater than or equal 50 cubic feet		
Annual total CH ₄ emissions calculated by flow meter (mt CH ₄) (emissions calculated using flow meters)		

Table 3. Voluntary Actions Taken to Reduce Methane Emissions During Reporting Year

Mitigation actions implemented to reduce methane emissions	Methodology used to quantify reductions (type)	Methodology used to quantify reductions (details)
Emission reductions from voluntary action (mt CH ₄)

Storage Tank Venting

Applicable Segments: Production, Gathering & Boosting, Transmission Compression

Jump to: [Production or Gathering & Boosting](#) [Transmission Compression](#)

Table 1. Fixed-Roof Tanks - Production, Gathering & Boosting

Using Calculation Methods 1 & 2

Total volume of oil sent to tanks from all gas-liquid separators or gathering and boosting non-separator equipment or wells flowing directly to atmospheric tanks with oil throughput ≥ 10 barrels/day (bbl/year)	
Number of wells sending oil to gas-liquid separators or directly to atmospheric tanks at ≥10 bbl/day	
Actual count of atmospheric tanks	
Annual CH ₄ emissions (mt CH ₄)	
	Count
	Annual CH₄ emissions (mt CH₄)
Tanks that control emissions with vapor recovery systems	
Tanks that vented directly to the atmosphere	
Tanks with flaring emission control measures	
Gas-liquid separators whose liquid dump valves did not close properly	

Using Calculation Method 3

Total annual oil/condensate throughput that is sent to all atmospheric tanks from wells, separators, and non-separator equipment with oil throughput <10 barrels/day (bbl/year)	
Count of wells with gas-liquid separators	
Count of wells without gas-liquid separators	
Actual count of atmospheric tanks	
Annual CH ₄ emissions (mt CH ₄)	
	Count
	Annual CH₄ emissions (mt CH₄)
Tanks that did not control emissions with flares	
Tanks that vented directly to the atmosphere	
Tanks with flaring emission control measures	

Table 2. Floating Roof Tanks - Production, Gathering & Boosting

Actual count of floating roof tanks	
Annual CH ₄ emissions (mt CH ₄)	

[Return to top](#)

Table 3. Voluntary Actions Taken to Reduce Methane Emissions During Reporting Year - Production and Gathering & Boosting

Number of tanks routed to VRU or beneficial use	
Number of tanks routed to flare	
Emission reductions from voluntary action (mt CH ₄)	

This cell will automatically calculate the total number of tanks routed to flare, summing the values in cells C18 and C31

Table 4. Storage Tank Vents - Transmission Compression

[Return to top](#)

	Count	Annual CH₄ emissions (mt CH₄)
Storage tank vent stacks with flares attached		
Storage tank vent stacks without flares attached		
Storage tank vent stacks with dump valve leakage directly to atmosphere		
Storage tank vent stacks with flared dump valve leakage		
Storage tanks utilizing the alternate calculation method		

Table 5. Voluntary Actions Taken to Reduce Methane Emissions During Reporting Year - Transmission Compression

Number of tanks with compressor scrubber dump valve leakage routed to flare or control device	
Emission reductions from voluntary action (mt CH ₄)

Renewable Natural Gas Applicable Segments: Transmission Pipeline, Distribution

Table 1. General Information

Investing in biogas projects	Directly interconnecting with biogas project	Delivering RNG to end users	Supplying RNG to end users	Purchasing environmental attributes for RNG that is physically connected to the company's system	Purchasing environmental attributes for RNG that is not physically connected to the company's system

What role(s) does your company play in the RNG process?
 Does your company offer a "green gas" option to residential customers?

Table 2. Information About the Biogas Source

Biogas Project ID	What is the feedback for the biogas?	Specify "Other" Feedback	Name the specific municipal landfills/landfill or digester from which the RNG was generated	What upgrading technology was used?

Table 3. Information About the Pipeline Interconnect(s)

Type of interconnect	If interconnect with natural gas customer		If interconnect with biogas project						
	Name of interconnecting company	Biogas Project ID	Location of the interconnect (latitude)	Location of the interconnect (longitude)	Volume of gas received this year (scf gas)	Reference to the company's gas quality standards that are applicable to this project (e.g., pipeline tariff)	How far is the interconnect from the feedback source point?	Is there a virtual pipeline?	If yes, details about the virtual pipeline

Table 4. Information about the end use(s) and environmental attributes

Biogas Project ID (if known)	How is the end use market for the RNG (project/site/facility) (if known)?	What is the end use?	Specify "Other" end use	Volume of RNG being sold and use, this year (scf gas) (if known)	Does your company currently own the environmental attributes for the RNG?	If your company does not own the environmental attributes now, how does it (if known)	If your company does, or at one point did, own the attributes for the RNG, does your supply contract for renewable natural gas include language that automatically conveys the RNG environmental attributes to your company (e.g., by way of a contract clause, retention)?	If your company is selling "renewable" natural gas to another downstream party (e.g., distributor, end consumer, etc.), how do you automatically convey the RNG environmental attributes to your company (e.g., by way of the downstream buyer)?	If your company using a third party provider to carry or track attributes? If so, which one(s)?

Table 5. Information about the Partner's strategy for supply of "low carbon fuels"

Company-specific goals or strategies for supply of "low carbon fuels" (such as upgraded biogas, hydrogen, etc.) (e.g., percent of natural gas supply to be RNG by a certain year; convert vehicle fleet to run on natural gas and use RNG for fuel, if applicable)
Is your company blending hydrogen into its natural gas supply?
At what rate will you be blending (in hydrogen by volume)?
What is the source and/or feedback of the hydrogen? (e.g., renewable/natural gas)
Is any upgrading/cleaning of the hydrogen required before injection?
What pipeline types does your company inject hydrogen into (material and processes)?
Have you done any related customer engagement?
Has anything been done to customer appliances (if yes, what)?

Additional Information

This space provides an opportunity for reporting optional, qualitative information that was not covered in the above data elements.

Additional information on the role(s) your company plays in the RNG process or "green gas" offerings
Additional information on the biogas project(s)/ upgrading process(es)
Additional information on the interconnect process
Additional information on the end use(s)
Additional information about environmental attributes

Partners may provide information on technologies/practices/approach currently included in the program. This information may be provided c please upload it with your BMP form(s) in e-GGRT.
