This submission includes a series of non-substantive changes to the instruments to be administered as part of the evaluation of the second cohort of HUD's Older Adult Home Modification Program. Recommended revisions are based on feedback from OAHMP grantees (cohort 1) and findings from comparisons of the Centers for Medicaid and Medicare Health Outcomes Survey (HOS), the Johns Hopkins University National Health and Aging Trends Study (NHATS), and the University of Michigan Health and Retirement Study (HRS) datasets. Revisions include:

- (1) edits to clarify questions,
- (2) relocating questions between forms to reduce the burden on the occupational therapists (OTs) who – in many instances – are not internal grantee staff,
- (3) splitting or providing "follow-up" question(s) to help clarify client response(s), and
- (4) reframing the wording of questions to better align with NHATS and/or HRS.

Although the number of questions in some DCIs did not increase nor decrease, Solutions may have reduced or increased response options to conform to options included in the NHATS or HRS, e.g. the original form may have specified numerous options for Hispanic but the revised form asks the question as a yes or no option; or original options were "yes," "no," or "unable", but the revised form provides additional option of "don't know" or enables grantee to mark "refused to answer." Solutions revisions reduce the overall number of questions for all DCIs from 278 to 274.
