

and the Secretary of State may pay the necessary travel expenses of members of the Advisory Committee. The terms of all currently appointed Advisory Committee members expire on December 31, 2024. NMFS is soliciting nominees to serve as members of the Advisory Committee for a term of 2 years that will begin January 1, 2025, and expire December 31, 2026.

ATCA specifies that the U.S. Commissioners may establish species working groups for the purpose of providing advice and recommendations to the U.S. Commissioners and to the Advisory Committee on matters relating to the conservation and management of any highly migratory species covered by the ICCAT Convention (see 16 U.S.C. 971b-1). Any species working group shall consist of no more than seven members of the Advisory Committee and no more than four scientific or technical personnel, as considered necessary by the Commissioners. Currently, there are four species working groups advising the Committee and the U.S. Commissioners: a Bluefin Tuna and Albacore Working Group, a Swordfish/Sharks Working Group, a Billfish Working Group, and a Bigeye, Yellowfin, and Skipjack Tunas Working Group. Scientific or technical personnel (known as Technical Advisors) appointed to species working groups serve at the pleasure of the Commissioners; therefore, the Commissioners can choose to alter these appointments at any time. As with Committee Members, Technical Advisors may not be represented by a proxy during meetings of the Advisory Committee. Nominees should be able to fulfill the time and travel commitments required to participate in the annual spring meeting of the Advisory Committee, when the species working groups are convened, in addition to ad hoc meetings throughout the year, as appropriate.

Procedure for Submitting Nominations

Nominations to either the Advisory Committee or a species working group should include a letter of interest and a resume or curriculum vitae that describes the individual's knowledge and experience in a field related to the highly migratory species covered by the ICCAT Convention. Self-nominations are acceptable. Letters of recommendation are useful but not required. When making a nomination, please specify which appointment (Advisory Committee member or Technical Advisor to a species working group) is being sought. Nominees are also encouraged to indicate which of the four species working groups is

preferred, although placement on the requested group is not guaranteed.

NMFS encourages nominations for women and for individuals from underserved communities that meet the knowledge, experience, and other requirements of the positions described in this notice. See Executive Order (E.O.) 13985 (Advancing Racial Equity and Support for Underserved Communities Through the Federal Government) section 2 (defining "underserved communities" as populations sharing a particular characteristic, as well as geographic communities, that have been systematically denied a full opportunity to participate in aspects of economic, social, and civic life, such as Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders and other persons of color; members of religious minorities; lesbian, gay, bisexual, transgender, and queer (LGBTQ+) persons; persons with disabilities; persons who live in rural areas; and persons otherwise adversely affected by persistent poverty or inequality.). SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for renewal of an approved information collection.

Since 2002, the National Oceanic and Atmospheric Administration's (NOAA) National Marine Fisheries Service (NMFS) has promulgated several rules restricting the use of large mesh and stringer pound net leaders in certain Virginia Chesapeake Bay waters during the late spring/early summer each year. On June 17, 2002, an interim final rule was published (67 FR 41196) restricting leader use, which also required year-round reporting of sea turtle takes. In 2004, NMFS issued a final rule further restricting pound net leader use in Virginia (69 FR 24997). The 2004 rule retained the reporting requirement from the 2002 rule. These regulations (modifications to 50 CFR parts 222 and 223) were implemented as a result of high sea turtle strandings each spring in Virginia and the documented take of sea turtles in pound net leaders. On March 31, 2018, a revised Biological Opinion on NMFS gear regulations in the Virginia pound net fishery was completed pursuant to section 7 of the Endangered Species Act of 1973, as amended (ESA). An Incidental Take Statement was included in this

Biological Opinion, exempting the incidental take of a certain number of loggerhead, Kemp's ridley, green and leatherback sea turtles in pound net operations.

A non-discretionary term and condition of the Incidental Take Statement involved the reporting to NMFS of live or dead sea turtles taken in pound net operations (reflected in 50 CFR 223.206). The collection of this information on the incidental take of sea turtles in the Virginia pound net fishery is necessary to ensure sea turtles are being conserved and protected, as mandated by the ESA. Documenting the accurate occurrence of sea turtle incidental take in pound net operations will help to determine if additional regulatory actions or management measures are necessary to protect sea turtles caught in pound net operations. This information will help NMFS better assess the Virginia pound net fishery and its impacts (or lack thereof) on sea turtle populations in the Virginia Chesapeake Bay. The collection of this information is also imperative to ensure that the Incidental Take Statement is not being exceeded, the anticipated take levels are appropriate, and the effects analysis in the Biological Opinion is accurate. Further, reporting the take of live, injured sea turtles caught in pound net gear will ensure these turtles are transferred immediately to a stranding and rehabilitation center for appropriate medical treatment.

II. Method of Collection
