SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for a new generic information collection. The generic clearance is an important planning and engagement tool for NOAA/NWS. The National Oceanic and Atmospheric Administration's (NOAA) products and services support economic vitality and can affect America's gross domestic product. The National Weather Service (NWS) is a critical component of this service and operates under the mission to "provide weather, water and climate data, forecasts, warnings, and impact-based decision support services for the protection of life and property and enhancement of the national economy." Leveraging and integrating Social, Behavioral, and Economic Sciences (SBES) methodologies and knowledge is crucial to meeting this mission.

In order to effectively support public and partner decision-making, build actionable tools and information, and evaluate performance, it is imperative that the NOAA/NWS collect key SBES data and fully engage with our audiences. Additionally, the NOAA/NWS has articulated a priority to enhance services for historically underinvested and underserved communities and improve service equity across the board. These communities typically experience higher rates of poverty, homelessness, disabilities, and language barriers, which increase their vulnerability to hazard impacts.

II. Method of Collection

The procedures expected to be used include, but are not limited to, social network analysis, open, semi-structured and structured interviews, focus groups, surveys, and ethnographies to include participant observations.

III. Data

OMB Control Number: 0648-NEW.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this Information Collection Request (ICR). Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
