## HRSA Evaluation of the Maternal and Child Health Bureau Pediatric Mental Health Care Access and Screening and Treatment for Maternal Depression and Related Behavioral Disorders Programs Project

### Maternal Mental Health and Substance Use Disorders Program Practice-Level Survey

Funding for data collection supported by the  
Maternal and Child Health Bureau  
Health Resources and Services Administration  
U.S. Department of Health and Human Services

---

The Health Resources and Services Administration (HRSA) funded [insert name of state] to implement a Maternal Mental Health and Substance Use Disorders (MMHSUD) program, [insert program name]. HRSA also funded JBS International, Inc. (JBS) to conduct an evaluation of the Maternal and Child Health Bureau (MCHB) MMHSUD program (hereafter referred to as the HRSA MCHB evaluation). JBS is an independent evaluator of the program and is not part of HRSA or any other federal agency.

**Survey Purpose:** As part of the HRSA MCHB evaluation, we are conducting a survey of practices that have health professionals who are enrolled/participating in [insert name of state]'s HRSA MMHSUD program. The survey is designed to collect information on your practice's experiences with the MMHSUD program (e.g., assessing and treating behavioral health conditions, accessing behavioral health care services for your practice's patients, capacity to address behavioral health conditions) and assist HRSA in future program implementation.

**Survey Instructions:** This online survey should take less than twenty (20) minutes for you to complete. Please answer based on your current practice and understanding (you are not required to review data to answer the questions), unless otherwise indicated. There are no right or wrong answers to the survey questions. Please note that your responses will remain private and are voluntary. Survey results will be reported to HRSA in the aggregate, and no identifying information will appear in the evaluation reports without your prior approval. No identifiable data will be provided to HRSA.

**About Your State's Program:** Each state's **MMHSUD program** includes providing clinical behavioral health consultation and care coordination; enrolling health professionals, such as yourself into the MMHSUD program; and providing training on how to consult with the MMHSUD clinical behavioral health consultation service in your state and/or to provide behavioral health care in your practice.

**How to Create Your Practice's Unique Identifier:** Use your state abbreviation, last three digits of your practice's ZIP code, and first two letters of your practice name. For example, for the Good Health practice located in Ohio in the ZIP code 44101, the Unique Identifier would be OH101GO.

Note: Email addresses will only be used to confirm enrollment in the program and to track survey administration and completion.

### Helpful Terminology: For the purposes of this survey:

- **Behavioral health encompasses mental health and substance use disorders.**
- **Staff refers to all staff in your practice, not just physicians.**
- **Health professional refers to obstetricians/gynecologists, family physicians, pediatricians, physician assistants, advanced practice nurses/nurse practitioners, licensed practical nurses, registered nurses, counselors, social workers, medical assistants, patient care navigators, etc.**
- **Behavioral health consultation refers to tele-consultation service provided by a program's team of behavioral health experts for advising health professionals on providing behavioral health care.**
- **Care coordination support refers to a program service providing resources and referrals to a provider when they contact the program, or to the patient/family when the program works with patients/families directly.**
