

A 60-day notice published in the Federal Register on December 5, 2023, Vol 88, Number 232, pp. 84335-84336. During the 60-day public comment period, ACL received two comments related to the ACL Program Performance Report Template. A summary of the comments and the ACL response is provided below:

Comment #1: Suggest including more specific instructions for completing the elements in the proposed ACL Program Performance Report Template:

ACL response: While ACL appreciates this suggestion, the instructions for completing the elements must be somewhat broad in order to account for differences in the goals, objectives, and activities across the programs.

Comment #2: Request confirmation that the grantee will be responsible for submitting a comprehensive program performance report each reporting period to ACL (as opposed to having grantees' subcontractors each submit individual reports to ACL).

ACL response: Although grantees could work with their subcontractors to gather information to complete their program performance report, grantees would be responsible for submitting a comprehensive program performance report for the specified reporting period.
