

## Form II - Part VI: Program Integration

**13. How will this test standard be integrated into the laboratories training and qualification system?**

**14. How will this test standard be integrated into the applicant's factory surveillance program?**

**15. Approximate number of products currently evaluated under this standard.**

**16. Actual Number of products currently certified under this standard.**

<b>Paperwork Reduction Act Statement</b>	<b>OMB Control Number: 1218-0147</b>
--	--

According to the Paperwork Reduction Act of 1995, no person is required to respond to a collection of information unless such collection displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 2 hours for each test standard. This burden includes locating and assembling information required to complete the application and is included in the burden calculated for initial applications and expansions. The obligation to respond to this collection is voluntary. Information obtained from this form will be used to determine if the application and supporting information meets the requirements of the NRTL Program as outlined in 29 CFR 1910.7. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: U.S. Department of Labor, OSHA, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, 200 Constitution Avenue, NW, Room N3655, Washington, DC 20210.

## Form II General Completion Directions

OSHA safety standards require that specified equipment and materials (products) be tested and certified for safety by an OSHA-recognized organization. OSHA's Nationally Recognized Testing Laboratory (NRTL) Program fulfills this responsibility by recognizing the capabilities of mainly private sector testing organizations to test and certify such products for manufacturers.

To be recognized, an organization must meet OSHA's requirements. Initial recognition is granted if the application and an on-site audit of the organization demonstrate the applicant is completely has the capability to test and certify products for safety. An organization must have the necessary capability both as a testing laboratory and as a product certification body to receive OSHA recognition as a NRTL. Once recognized, OSHA reviews each NRTL's activities to assure it continues to comply. The NRTL can also request an expansion of its recognition. This form, and its attachments, asks the NRTL to verify its general information as well as provide specific information related to its facilities and capabilities to meet NRTL Program requirements. Completing this form is entirely voluntary. Each applicant is free to submit an application for initial recognition or expansion using any form it chooses. However, OSHA will consider applications that do not contain the information requested in this form to be deficient and may delay or deny the request.

An applicant that chooses to use this form for initial recognition or expansion must send: (1) this completed form; (2) any additional information it wishes to submit to demonstrate capabilities to meet NRTL Program requirements; and (3) payment to:

Director  
Office of Technical Programs and Coordination Activities  
Directorate of Technical Support and Emergency Management  
Occupational Safety and Health Administration  
US Department of Labor  
200 Constitution Avenue NW, Room N3655  
Washington, DC 20210

Completed and signed forms and any accompanying documentation may also be scanned and emailed to [nrtlprogram@dol.gov](mailto:nrtlprogram@dol.gov). For questions, contact the Office of Technical Programs and Coordination Activities at +1.202.693.1911

## Form II - Part I Directions

Part I of this form provides basic information related to the test standard. The information will be used to determine if the standard is appropriate. Complete each block as indicated below.

- Block 1:** Enter the designation for the requested test standard (e.g., UL 2305).
- Block 2:** Enter the full title for the requested test standard (e.g., Exhibition Display Units, Fabrication, and Installation).
- Block 3:** Enter the year the test standard was recognized or revised by the standard development organization.
- Block 4:** Enter the name of the standards development organization that developed and approved

the test standard

**Block 5:** Enter the name of the test site that is currently recognized or requested where this testing will be conducted. If more than one test site, list the primary test site or company headquarters.

**Block 6:** Enter the physical street address, city, state, and postal code for the headquarters office of the applicant. For international addresses, enter the province followed by the country name in **Block 6c**.

## Form II - Part II Directions

Please identify at least one representative example of test equipment owned by the applicant that will be used to meet the requirements outlined in the requested test standard.

**Block 7:** **Block 7a.** Enter the clause(s) in the test standard that require the use of the test equipment.

**Block 7b.** Enter the type of measurement the test equipment will be used for in relation to the clause identified in **Block 7a**.

**Block 7c.** Enter the name and model number of the test equipment used to take the measurement defined in **Block 7b**.

## Form II - Part III Directions

Please enter test clauses associated with the requested test standard that require special consideration or special requirements when capturing test data. Identification of special requirements will facilitate the analysis of newly identified test standards.

**Block 8:** **Block 8a.** Enter the clause(s) in the test standard that the NRTL will address with test laboratory procedures.

**Block 8b.** Enter the procedure the applicant proposes to use to address the special requirements and / or consideration as outlined in the clause identified in **Block 8a**.

**Block 8c.** Check *Yes* or *No* to verify if the procedure defined in **Block 8b** is currently in place at the applicant test site.

## Form II - Part IV Directions

Please enter the approach to meeting the requirements for capturing and recording test data defined in the test standard.

**Block 9:** Provide a detailed description of the approach the applicant intends to use to capture and record test data. Include any test datasheets associated with this test standard with the applicant's submission.

**Block 10** **Block 10a.** Enter the clause(s) in the test standard that contain specific data collection requirements.

**Block 10** **Block 10b.** Enter the name of the datasheet and the item number used to capture this information. If using an alternate data collection procedure, identify the procedure clause that describes how the test data for the clause(s) identified in **Block 10a**.

*(continued)*

## Form II - Part V Directions

Please enter the special facilities or apparatus that is required to conduct the test for which the applicant applied.

**Block 12** **Block 12a.** Enter the clause(s) in the test standard that have requirements for special facilities or apparatus.

**Block 12b.** Enter the procedure the applicant proposes to use to address the required special facility and / or apparatus outlined in the clause identified in **Block 12a.**

**Block 12c.** Check *Yes* or *No* to verify if the facilities and /or apparatus defined in **Block 12b** is currently in place at the applicant test site.

## Form II - Part VI Directions

Please enter the special facilities or apparatus that is required to conduct the test for which the applicant applied.

**Block 13** Provide a description of how the requirements of the proposed test procedures will be integrated into the organization's training and qualification programs.

**Block 14** Provide a description of how the requirements of the proposed test procedures will be integrated into the organization's factory surveillance programs.

**Block 15** Enter the appropriate number of products currently tested by the applicant under this standard (*includes testing conducted outside the NRTL Program*). If unsure, provide best approximation or number over a specific time period. (Ex: 100 over past 12 months)

**Block 16** Enter the number of products currently listed by the applicant under this standard (*includes testing conducted outside the NRTL Program*).

## Form II - Part VII Directions

Part VII provides an alternative method for validating a NRTL has the requisite capabilities to meet the requirements to conduct a test in accordance with the specifications outlined in the requested test standard. Part VII relies on comparing the currently recognized capabilities of a NRTL with comparable requirements outlined in the requested test standard. Part VII can be used to identify

similarities in capabilities and differences. In identifying differences in capabilities, the NRTL need only demonstrate how these differences will be addressed in their operations. Because Part VII relies on currently recognized capabilities, it is not available for use by new initial applicants.

**Block 13** **Block 13a.** Enter the clause of the requested test standard.

**Block 13b.** Enter the number of the comparable test standard

**Block 13c.** Enter the clause(s) in the test standard listed in **Block 13b** that defines comparable requirements to a requirement in the requested test standard.

**Block 13d.** Enter a description of the significant differences, if any, between the requirements outlined in the test standard listed in **Block 13a** and those outlined in the requested test standard

**Block 13e.** Enter any additional information the NRTL would need to include to demonstrate their capabilities in being able to perform the requirements identified in

**Block 13d.**
