<p>The 2023-24 National Postsecondary Student Aid Study (NPSAS:24) is a nationally representative cross-sectional study of how students and their families finance education beyond high school in a given academic year. NPSAS is conducted by the National Center for Education Statistics (NCES) and was first implemented by NCES during the 1986–87 academic year and has been fielded every 3 to 4 years since. This request pertains to the 12th cycle in the NPSAS series being conducted during the 2023–24 academic year. NPSAS:24 will consist of a nationally representative sample of undergraduate and graduate students, and a nationally representative sample of bachelor’s degree completers. Subsets of questions in the NPSAS:24 student survey focus on describing aspects of the experience of bachelor’s completers in their last year of postsecondary education.</p> <p>The request to conduct all activities related to NPSAS:24, including materials and procedures related to the NPSAS:24 student data collection, consisting of abstraction of student data from institutions and a student survey was approved by OMB in December 2023, with updates approved in January 2024 (OMB#1859-0666 v. 36 and 37), August 2024 (OMB#1859-0666 v. 38), and September 2024 (OMB#1859-0666 v. 39).</p> <p>This request is for approval (1) to shift the end date of data collection from October 31, 2024, to January 12, 2025; (2) to modify and add contacting materials; and (3) to offer non-FAFSA filers in all waves a \$10 boost to increase their likelihood of participation in the student survey. OMB approved a \$10 boost incentive for the earlier data collection waves (1-3) on August 13, 2024 (OMB#1859-0666 v. 38) and a second \$10 boost incentive for the remaining waves of data collection on September 16, 2024 (OMB#1859-0666 v. 39). These earlier boosts targeted key underrepresented sample groups using a binary logistic regression model. The current request would target an additional group of sample members who did not submit a federal aid application for the 2023-24 financial aid year, in all data collection waves. This request does not introduce significant changes to the estimated respondent burden or the costs to the federal government.</p>
