**Directional Indicators for  
Civil Rights Data Collection  
for School Years  
2025–26 and 2027–28**

*Revised after 60-day public comment period.*

---

Responses to, and changes made as a result of comments received during the 60-day public comment period are primarily addressed and reflected in Attachment B. In this Directional Indicators document, changes made as a result of comments received during the 60-day public comment period are noted with a “†”.

## INTRODUCTION

---

Attachment A-4 contains guiding questions, or directional indicators (DI), used to reduce burden on local educational agencies (LEA). It is organized as follows:

- Overview of directional indicators
- List of directional indicators

Directional indicators are used to determine whether a data group is applicable to an LEA. For example, an LEA will be presented with a simple question asking whether or not students are enrolled in Advanced Placement (AP) courses at the school. If the LEA answers “no,” then the subsequent tables collecting student counts of AP enrollment, and exam-taking are not presented to the LEA.

## OVERVIEW OF DIRECTIONAL INDICATORS

---

Because the CRDC is a mandatory collection, LEAs are obligated to respond to each applicable survey question. Directional indicators successfully reduce the burden by eliminating tables that are not applicable, therefore reducing the amount of time LEAs spend entering zeros into non-applicable tables. Directional indicators were first implemented with the 2009–10 CRDC, and continued with the last seven CRDCs, including the most recent—the 2023–24 CRDC. As OCR continues to improve the design of the web-based survey tool, OCR will continue to include directional indicators in the CRDC to determine whether the LEA will be presented with subsequent data group tables.

Many of the directional indicators are linked to existing data groups. For example, in DG932, OCR collects each grade offered at a school. Data are used to determine which applicable grade-level retention tables are presented to the LEA (e.g., a school offering grades 10, 11, and 12 would be presented only with the retention tables for grades 10, 11, and 12). However, there are some data groups which apply only to a subset of schools and this subset of schools cannot be determined from already collected information. For example, to limit the burden of responding to data elements collecting detailed AP data, OCR designed a directional indicator to determine which high schools (offering any grade 9-12) also offered AP courses. These directional indicators minimize the burden of responding to the CRDC for LEAs and schools.

The following list of directional indicators may be expanded as OCR designs the 2025–26 and 2027–28 survey tools. All directional indicators are designed to minimize the burden of the CRDC collection to the extent possible on participating school districts. Data collected by directional indicators are not factored into OCR’s burden estimates.

The Programme is typically taught over two years. IB Diploma Programme students study six courses at higher level or standard level. Students must choose one subject from each of groups 1 to 5, thus ensuring breadth of experience in languages, social studies, the experimental sciences and mathematics. The sixth subject may be an arts subject chosen from group 6, or the student may choose another subject from groups 1 to 5. Additionally, IB Diploma Programme students must meet three core requirements: the extended essay, the theory of knowledge course, and a creativity/action/service experience.</p>

<b>Comment</b>	<p>A magnet program is a program within a public school that offers a special curriculum capable of attracting substantial numbers of students of different racial/ethnic backgrounds, which may also reduce, prevent, or eliminate minority group isolation. The program may be designed to provide an academic or social focus on a particular theme (e.g., science/math, performing arts, gifted/talented, or foreign language). A public school is considered a magnet school if it operates a magnet program for all students or some students within the school.</p> <p>For the CRDC, only magnet schools or magnet programs that have a written mission statement with the explicit aim of preventing minority group isolation, are counted.</p>

<b>Comment</b>	<p>For co-educational schools only. Independent study is not considered a single-sex class. Include academic classes for grades K-12, and comparable ungraded levels.</p> <p>Single-sex academic class – A single-sex academic class refers to an academic class in a co-educational school that excludes boys or girls from enrolling or otherwise participating in that class because of their sex. A class is not considered single-sex so long as it does not exclude boys or girls, even if students of only one sex, or a disproportionate number of students of one sex, enroll. A physical education class is not considered an academic class.</p>
