Attachment J.1: The Obesity and Type II Diabetes Risk Assessment and Child Assessment: Flyer

Note: For outreach purposes, we plan to market the combined assessments as the Mobility Opportunity Vouchers to Eliminate Disparities (MOVED) Study

An Invitation!

You are invited to participate in another important research opportunity—the **Mobility Opportunity Vouchers to Eliminate Disparities (MOVED) Study!**

Researchers from Johns Hopkins in partnership with Abt Associates are conducting an additional study for families who enrolled in the Community Choice Demonstration. Participating in the MOVED study assessment should take about 3 hours to complete. You and your child can receive gift cards of up to \$140 for completing the study activities, depending on how many of the activities you and your child agree to participate in.

The study will collect data from one adult and one child in each family. The study team hopes to conduct the MOVED Study Assessment once now, and then again two years later. Participation in this study is your choice and does not affect your participation in the Community Choice Demonstration.

This research is being done to understand how your home and neighborhood impact your health, including your weight and risk of developing Type II Diabetes. The research also tries to understand how your home and neighborhood affect your children by learning about their health, school, and friendships.

Someone from Abt Associates will reach out to you over the next few weeks to tell you more about the MOVED study. You can also contact the study team to get more information.

Protecting your privacy

All information collected about families in the study will be kept private to the fullest extent allowed by law. The names of family members participating in the study will never appear in any reports or study findings. All members of the study team are trained to keep all data confidential and secure.

This research is conducted under the authority of the Secretary of the U.S. Department of Housing and Urban Development to undertake programs of research, studies, testing and demonstration related to the mission and programs of HUD (12 USC 1701z-1 et seq.). Some study activities are being funded by the National Institute of Diabetes and Digestive and Kidney Diseases.

If you require information to be presented in an accessible format or reasonable accommodations to participate in this study, please contact us with any specific requests by calling xxx-xxx-xxxx or emailing xxxx@xxxx.xxx. If you require language assistance to participate in this study, please contact us with any specific language assistance requests or needs.
