

Feedback Form

Spatial, Address, and Imagery Data Program

The U.S. Census Bureau is adding a feedback component to its geographic partnership programs to improve the administration of the respective program and potentially reduce the future burden. Eligible participants may be asked to provide their feedback on materials, method(s) of data collection, manner of communications, and the usability of the program applications and tools. For the Spatial, Address, and Imagery Data Program, the feedback component may apply to a maximum of 25 eligible participants.

1. Tell us about your experience with the Spatial, Address, and Imagery Data Program. What did you like about the process overall? What would you like to see improved?
2. How was the quality of communication from the Census Bureau regarding the purpose of the Spatial, Address, and Imagery Data Program and how to participate? Do you have any feedback on changes in method or format of communication?
3. If you submitted files through the Secure Web Incoming Module (SWIM), or equivalent file transfer module, what was your experience using that interface? What do you think could be improved?
4. If you submitted files using a physical hard drive, what was your experience using that method of data sharing? What do you think could be improved?

The Census Bureau estimates that participating in the feedback component of the Spatial, Address, and Imagery Data Program will take an hour on average. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, using Paperwork Reduction Project 06071008 as the subject, to <geo.imagery@census.gov>. This collection has been approved by the Office of Management and Budget (OMB). The eight-digit OMB approval number confirms this approval. If this number were not displayed, we could not conduct this component of the survey. The Census Bureau conducts this program under the legal authority of the Title 13 United States Code, Sections 16, 141, and 193.
