Introduction

The DoD National Defense Science and Engineering Graduate (NDSEG) Fellowship Program is a competitive fellowship that is awarded to U.S. citizens, U.S. nationals, and U.S. dual citizens who intend to pursue a Doctoral degree aligned to the DoD services Broad Agency Announcements (BAAs) in research and development at a U.S. institution of their choice. Since the program's inception, over 4,400 DoD NDSEG fellowships have been awarded and over 70,000 applications received. DoD plans to award between 150-350 new three-year graduate fellowships each fiscal year (subject to the availability of funds) to individuals who have demonstrated ability and special aptitude for advanced training in Science and Engineering. Our Outreach Plan outlines a comprehensive approach for contacting colleges, universities, and professional technical associations that will enhance the advertisement of the program to diverse technical audiences and groups of high-quality PhD candidates.

1. Objective

To recruit high-quality students (U.S. Citizens, U.S. Nationals, U.S. Dual Citizens) who intend to pursue a Doctoral degree at a U.S. Institution aligned to the following DoD Strategic Documents (e.g., BAA/FOAs) in research and development:

1. Aeronautical and Astronautical engineering
2. Artificial Intelligence and Machine Learning
3. Astrodynamics
4. Biomedical engineering
5. Biosciences (includes toxicology)
6. Biotechnology
7. Chemical engineering
8. Chemistry
9. Civil engineering
10. Cognitive, neural, and Behavioral Sciences
11. Computer and Computational Sciences
12. Cyber Sciences (to include "hard" networks, cybersecurity, disinformation)
13. Electrical Engineering
14. Geosciences (includes terrain, water, and air)
15. Materials Science and Engineering
16. Mathematics
17. Mechanical Engineering
18. Naval Architecture and Ocean Engineering (includes undersea systems)
19. Oceanography (includes ocean acoustics, remote sensing, and marine meteorology)
20. Physics (including optics)
21. Political, Economic, and Sociocultural Sciences
22. Quantum Science
23. Space physics

2. Approach

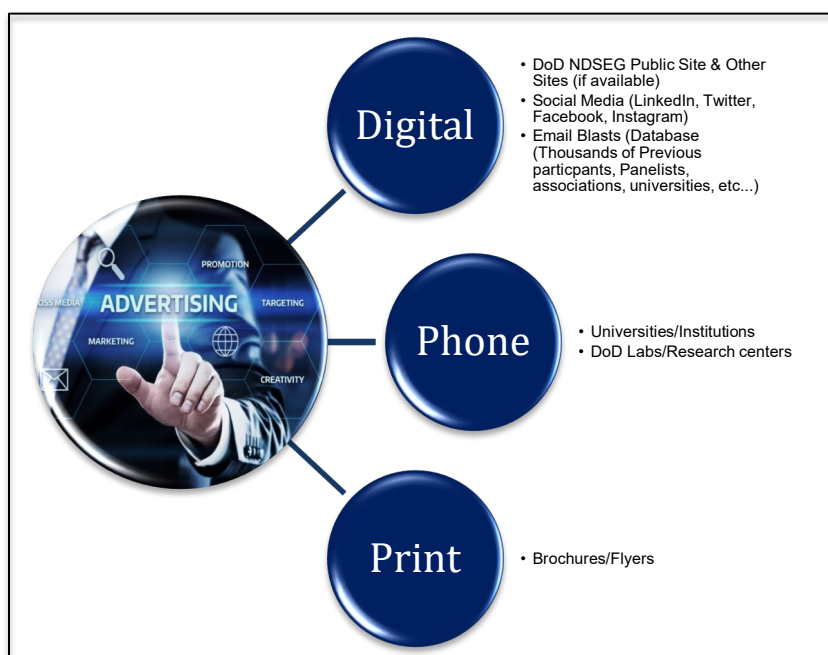

The DoD NDSEG Outreach Plan incorporates a combination of digital and print communications in order to reach the target population for advertising the DoD NDSEG Fellowship program (Academia/Industry/Government). Methods include targeted email blasts, program brochures, contact via phone, as well as the use of social media such as LinkedIn, Twitter, Facebook or similar. These communications platforms are integral components of our advertising, marketing, and promotional approach.

Social media is a powerful tool used to reach potential Fellows where they “reside.” Social media platforms such as LinkedIn, Twitter and Facebook can be used to establish informal virtual networking groups, join existing science, technology, research & development networking groups. These tools can be effectively leveraged to invite program participants, former program participants, and other stakeholders to learn more about the program and share the program within their networks to rapidly increase awareness of the program and participation over time.

We will utilize multiple social media tools as they are a critical form of communication and an essential digital tool for reaching out and connecting with potential DoD NDSEG applicants.

2.1 Objective

Our goal will be to increase participation by underrepresented institutions by 5% annually. We will collect data from the previous awardees and applicants to determine specific fellow qualifications and demographics and program requirements that may enhance our approach to advertising this program. We will use existing processes and tools (e.g., social media platforms) tailored for DoD NDSEG Fellowship recruitment and marketing where applicable.

We will use existing processes and tools (e.g., social media platforms) tailored for DoD NDSEG Fellowship recruitment and marketing where applicable.

3. Tactical Plan

Utilize Database/Email Blast Notifications

We will use an expansive database of higher education administrators, faculty, and NDSEG Fellows to communicate and advertise opportunities. This resource allows us to immediately begin advertising DoD NDSEG opportunities to a wide and diverse audience. Currently, there are over 4,300+ faculty who have access to qualified applicants nationwide and are also eligible to support the NDSEG program serving as Panelist.

Systems Plus will create and send e-mail blast notifications once a week throughout the

application period and post to Social Media ~1-2 times a week. Our database of potential qualified fellows and all newly added fellows will capture characteristics specifically relevant to the DoD NDSEG program (e.g., by institution type, educational level, targeted disciplines, or other determined criteria). Systems Plus will continuously review information in its database for accuracy and integrity to ensure for an effective advertising effort. We will also work on growing our database to increase our advertising footprint throughout each fellowship cycle.

Conduct Recruitment Activities

Based on past experience recruiting for a similar fellowship effort, we have determined that the best strategy for recruiting high caliber students is to make information available year-round through the program website and, when available for participation, informational webinars. To accommodate the maximum number of qualified fellows, we understand the necessity for volume while still retaining quality in recruiting efforts. Marketing techniques, including electronic materials and online advertising will direct candidates to the website and we will reach out to contacts from previous DOD NDSEG cohorts and other managed programs to promote DoD NDSEG opportunities.

Social Media Campaign

We utilize highly accessible social media techniques and strategies to provide information on opportunities, general communication, information sharing, and awareness building. To increase our social marketing presence and support our effort to engage the higher education community interested in DoD research and opportunities, we will utilize hashtags (Appendix C) either new or existing that identify a keyword or topic of interest relevant to the DoD NDSEG. This will enable posts to be indexed by a social network and become searchable/discoverable by users in a specified community and/or group with interest related to this program. Further, through social media, we will also strive to maintain an informed awardee/alumni support and partnership network.

4. Program Timeline

- The official advertising cycle for the DoD NDSEG program will commence August and continue through the end of the application period, November/December
- Annually, the application period will begin September 1st of each year and end on November 3rd of each year
- Opportunities for marketing and recruiting for the program will occur year-round.

5. Additional Advertising Activities

The advertising tactics will consist of the following “additional” activities, as requested, by the government or other stakeholders to identify, inform, assist, track, and provide follow-up as needed to potential applicants:

- Webinars
- Flyers
- Quarterly newsletters
- Brochures

6. Specific DoD NDSEG Targeted Marketing Activities

A representative sample listing of the Advertising Plan's outreach efforts is identified in the sections below.

6.1 College and Universities Recruitment/Advertisement List

A representative listing of colleges and universities is included in **Appendix A**. The list represents a diverse group of institutions, including a number of HBCU/MI/TCU/HSI members of the academy. The email blast that goes out advertising the DoD NDSEG contains over 4,300+ individual faculty names at the various colleges and universities who have access to qualified students pursuing graduate and doctoral degrees.

6.2 Professional Technical Association Recruitment/Advertisement List

We have an extensive network of professional technical association contacts that have been engaged on similar projects for other DoD entities. Outlined below are a representative list of associations that will be engaged:

National Society of Black Engineers (<http://www.nsbe.org/Home.aspx>)

Society of Hispanic Professional Engineers (<http://www.shpe.org/>)

Society of Women Engineers (<http://societyofwomenengineers.swe.org/>)

Institute of Electrical and Electronics Engineers (<http://www.ieee.org/about/index.html>)

Society of Military Engineers (<http://same.org/>)

National Society of Professional Engineers (<http://www.nspe.org/>)

Association for the Advancement of Artificial Intelligence (AAAI) (<http://www.aaai.org/>)

6.3 Federally Funded Research & Development Centers (FFRDCs) List

The federal government supports research and development (R&D) that is conducted by a wide variety of performers, including federally owned and operated laboratories, universities, private companies, and other research institutions (FFRDCs). We have listed FFRDCs as Appendix B which can provide the DoD NDSEG an additional outreach resource for government, industry, and academia.

6.4 HBCUs/MIs Recruitment/Advertisement List

We recognize that an important objective of the DoD NDSEG is to expand the participation of Fellows from HBCU/MIs and welcome and encourage diversity. Our objective is to seek applicants nationwide that effectively address individuals from historically underrepresented backgrounds. Those institutions where we will actively recruit and communicate with as part of our advertisement effort are marked with a "✓" symbol in **Appendix A** as well as the resources listed below:

- **Historically Black Colleges and Universities**

Website: <http://www.ed.gov/about/inits/list/whhbcu/edlite-list.html>

- **Hispanic Association of Colleges and Universities**

Website: http://www.hacu.net/assnfe/CompanyDirectory.asp?STYLE=2&COMPANY_TYPE=1,5

- **Society for Advancement of Chicanos and Native Americans in Science**

Website: <http://www.sacnas.org/>

Their mission is “to encourage Chicano/Latino and Native American students to pursue graduate education and obtain the advanced degrees necessary for science research, leadership, and teaching careers at all levels.”

- **Insight into Diversity (Affirmative Action Register)**

Website: <http://www.insightintodiversity.com/>

List of institutions, organizations and companies who make extra effort to reach qualified candidates within all segments of society, with special effort to notify members of federally mandated groups of advertised position openings. Publication online is at no added charge with purchase of printed ad.

- **Big Ten Academic Alliance**

Website: <http://www.btaa.org/resources-for/students>

Big Ten Academic Alliance universities have cooperated in the development of databases and collaborative communications for Ph.D.'s.

6.5 Office of the Secretary of Defense Initiatives

The DoD NDSEG Fellowship can work with OSD and DoD Service specific initiatives to tap into Defense Policy as it relates to science and engineering. This is also an opportunity to advertise and develop mentors for our young researchers to set them up for success as their careers mature.
